BERLIN ACOUSTICS

NEW WORK EFFECTIVELY DESIGNED

We help companies shape the future of work—with their people in mind. Together, we transform open-plan offices into productivity hubs where everyone can unlock their full potential.

Our booths feature a minimalist, modern, and timeless design. Manufactured in Germany, they offer outstanding quality at a fair price—bringing silence to any workspace. Because focused, undisturbed work should never be a luxury.

DRIVEN BY VALUES. DEFINED BY ACTION.

We're a young, driven team from Berlin — built for long-term success, not short-term wins.

Partnerships matter. We stay close, we stay real, and we go the extra mile to make big things happen.

QUALITY & SUSTAINABILITY

Quality and sustainability go hand in hand at our 3 German production sites. Over 90% of our raw materials come from the region — ensuring top standards, short supply chains, and independence from global disruptions.

INTELLIGENT DESIGN

For us, beauty lies in simplicity. Our booths are minimal, modern, and timeless — no flashy extras, no wasted costs.

We design with purpose, refine with every step, and build solutions that work now and evolve with you.

CERTIFIED TO DELIVER. TRUSTED TO PERFORM.

DIN EN ISO 14001

Our environmental management system forms the guidelines for the topic of sustainability, which is an essential part of our principles.

DIN EN ISO 9001

We have implemented a quality management system which we are constantly developing further. The consideration of customer feedback plays a decisive role in doing so.

CAM

We fulfill all the requirements of the "Quaderno Tecnico - Criteri Ambientali Minimi (CAM) - Settore 'Legno-Arredo'", which is further proof of the sustainability of our products.

DIN EN ISO 23351-1

Our booths are measured in relation to the degree of noise reduction. The high Class B results underlines the exceptional acoustic performance, especially when comparing to competitors in our price segment.

OUR CLIENTS
