A holiday feel every day

Perea pergola awnings

Discover the high-grade Perea pergola awnings from WAREMA. Enjoy comfort with your family, uninterrupted hours with your partner or a sociable evening with friends – protected from the sun, rain or unwelcome eyes. They provide shade, impress with their design and convince through their weather protection. On top of that, comfort and optional extras provide a high degree of individuality and comfort. We manufacture each of our premium awnings individually to your specifications in Germany.

Together outside

Pergola awnings from WAREMA

Do you have a modern home with cubic architecture and clean lines? Then enhance the design with the pergola awnings P20 and P40 and enjoy your optimum sun shading system on the patio. The pergola awning P40 is available in straight and curved versions and is equipped with secudrive® technology, which additionally tensions the fabric and prevents light gaps by guiding the awning fabric to the side. Give your outdoor area a unique look with these awnings.

More time with your Perea pergola awning

In all kinds of weather

Whether sun, wind or rain, a Perea pergola awning allows you to enjoy your patio whenever you please. You can shade up to six by six metres with a Perea pergola awning P70. This will make your patio the focus at your garden party. An attractive eyecatcher: The cloud curtain. The fabric is retracted in uniform, cloud-like folds for a sophisticated look.

Technical data and equipment

Individuality is the norm for us

The Perea pergola awning P20 impresses with its delicate design, while still offering high wind stability and excellent fabric tension. With the Perea P40, you can choose between straight or curved guide rails. The weatherproof version of the Perea P40 is the Perea P40 WeatherEdition. It protects with a rainproof, transparent covering. The Perea pergola awnings P60 and P70 offer further rain protection solutions. They have either a PVC grid incorporated into the fabric for drainage (P60) or a drainage gutter (P70). With the P60 and P70, the water drainage is unobtrusively built into the pole.

Plan your awning online or live at your own home with the WAREMA Configurator and the WAREMA Designer App:

PLUS X AWARD®
honoured as:
BEST BRAND OF THE YEAR 2021
www.plusxaward.com

Perea P60

❶
WMS Radio remote control
Convenient operation via hand-held transmitter, wall-mounted transmitter, smartphone or tablet

❷
Valance roller blind
Perfect protection, even with low-lying sun on the west side, for example

❸
Colour selection
Large selection of colours and designs for the frame and fabric

❹
LED strips
Integrated LED strips, remote-controlled and dimmable

❺
Radiant heaters
Infrared quartz technology or Design radiant heater with tinted glass ceramic

❻
Vertical shading
Front-mounted awnings with easyZIP guidance or GranTex with easyZIP guidance as ideal sun shading, visual privacy and wind protection

❼
secudrive® technology
Prevents an unwanted lateral light gap due to the tight guidance of the fabric and stabilises the awnings in windy conditions (also for P20, P40, P60, P40 WeatherEdition)

❽
Controlled rainwater drain
Rainwater drains through a PVC grid (P40 WeatherEdition and P60) incorporated into the fabric or through the drainage gutter and is drained through a rainwater drain integrated into the pole (P60 and P70)

❾
Outdoor power socket
The power socket can be positioned on the inside or outside of the pole and is available in three colours. Only for Perea P60 and P70.

Perea pergola awnings

Unique features

Experience exclusive WAREMA Colour Worlds

You can order the aluminium parts of your pergola awnings in more than 200 trendy colours from the WAREMA Colour World, depending on the model.

The wide Spectrum collection from WAREMA

For the Perea P20 and P40 product variants, you receive a wide range of acrylic fabrics.
For Perea P40 WeatherEdition, P60 and P70, you can choose from our “functional fabrics” in weather- and rainproof fabric qualities such as Sunvas Perla FR.

Dimmable LED lighting

The Perea P20, P40 and P60 can be equipped with LED strips integrated in the guide rails. For the Perea P70 light rails are available as surface mounted product variants on the reinforcement profiles. Both product variants can be individually adjusted with the WMS Dimmer. From bright light to atmospheric ambience lighting, all lighting variations for cosy summer evenings are possible.

P20	P40	P40 WE	P60	P70
●	●	●	●	●

The optional valance roller blind

The valance roller blind provides protection against low-lying sun and prying eyes from outside. Depending on your requirements, the valance roller blind can be operated by crank or conveniently with a WMS Hand-held transmitter.

Vertical shading

This solution perfectly matches your Perea pergola awning in terms of design: vertical shading using front-mounted awnings with easyZIP guidance or GranTex with easyZIP guidance. In the event of emerging wind, up to three sides can be closed using the radio system. This creates a living room with all-round protection, almost regardless of the weather.

P20	P40	P40 WE	P60	P70

Feel-good atmosphere with the radiant heater element

For when you want to use your patio in the evening when the temperature drops: the Design radiant heater (2,200 Watts) with tinted glass ceramic allows you to enjoy longer evenings under your awning. And with the WMS Dimmer 0-10 V, you can even switch and dim your radiant heater to three heating levels.

Perea pergola awnings

Unique features

Outdoor power socket

The addition of a power socket transforms your pergola awning into a multifunctional outdoor working, dining and entertainment area. The power socket is available in three colours and can be easily positioned on the inside or outside of the poles.

Two systems, perfectly combined

The KNX converter WMS reliably integrates your outdoor living products equipped with the WMS Radio system into any KNX system. This allows you to easily retrofit and expand an existing KNX system without major installation work. Awnings and the like can be operated and automated either via KNX or via WMS Hand-held transmitters, smartphones or WMS Weather sensors.

Control via hand-held transmitter or app

Operate your Perea pergola awning conveniently with the WMS Hand-held transmitter or WMS WebControl pro on your smartphone or using Amazon Alexa – even while on the go.

www.warema.com/en/webcontrol/

More extras

Automatic control

You can combine your pergola awning with a WMS Weather station. With this, your sun shading product automatically retracts when wind or precipitation set in and can automatically extend.

Insect screen: Undisrupted well-being

Looking to enjoy the summer carefree? With the clever WAREMA insect screens and pollen protection solutions, you can enjoy the most beautiful time of the year without limitations. The innovative VisionAir pollen protection and fine dust gauze effectively filter the finest airborne particles from the breathable air and make being at home a more relaxed experience, also for allergy sufferers. Whether door or window frames, fixed or variable, or with an opening for your pet – with us you can find the protection that suits your needs and your home in look and function. What's more, WAREMA solutions can also be attached at a later time.

Seamless protection: Light well cover

The fine mesh stainless steel grid keeps out irritating insects, spiders and mice, as well as leaves. Experience effective protection without impairing the function of your window. Light well covers from WAREMA are light and air permeable, and also very weather-proof. They are installed directly onto the existing grid and aren't a trip hazard thanks to their very flat shape.

Spend more time outside

Vertical shading with easyZIP

Additionally equip your Perea pergola awning P60 or P70 with a front-mounted awning and look forward to even more time in the fresh air. The vertical front-mounted awning provides protection from low sun, light wind and prying eyes. The easyZIP guidance ensures a tight curtain with high wind stability (up to 150 km/h), without any lateral light gaps.

You can attach the front-mounted awnings on every side of your Perea. This creates an "open air living room" on your patio. Choose your individual solution from our collection with over 200 designs – optimally suited to the colour of your Perea and for a uniformly aesthetic overall design.

Sustainability

A responsibility for nature and people.

To us, sustainability means holistic responsibility – and is deeply rooted in the WAREMA Group's DNA. Sustainability is not new for us. For many years, people, cooperation, and the protection of the environment have been at the heart of our work. We consider ourselves to be active contributors to the energy revolution!

We have therefore set ourselves ambitious goals as part of our sustainability strategy, in order to continue to reduce our corporate and product carbon footprints. We are already on our way to achieving this using a range of measures.

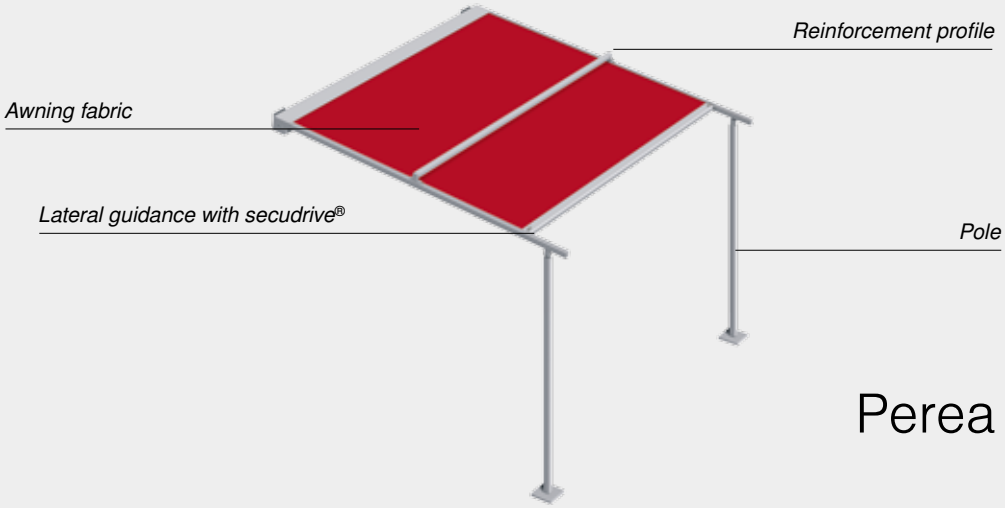

We have produced sun shading solutions for individual living situations that offer impressive quality and resource-saving longevity since 1955. Not least because they make a decisive contribution to reducing heating and cooling energy, ultimately helping to protect the environment.
