Like a little black dress, for any occasion

Its clean basic shape, the perfection of its details and the advanced technology make it universal. It fits anywhere. In all kinds of ambiences, from residential to office, retail, hospitality, public spaces, schools, hospitals and more. If you have Kalis, you have everything.

DESIGN:

Gigodesign

Product range

LUMINAIRE LUMINOUS FLUX:

980 - 5300 lm/m

MODULE LENGTH:

565 - 3085 mm

MODULE TYPE:

Single, Linear, Corner

DRIVER:

Casambi, DALI, FO

Modularity rules

With maximum application flexibility, Wave gives you the possibility to adapt the luminaire to your needs. There is an endless modularity you're gonna love.

Be creative in compositions

Get inspired and draw your light as big and as bold as you want. Integrate it in the space and give your visitors a reason to look up.

Module types

Create your perfect light selecting from a variety of light modules and construct them however you want!

Intra Constructor

Save your time and work efficiently using Intra Constructor – you simply configure your line and choose all the accessories which are then automatically listed with codes. So, you avoid any possible mistakes. automatically listed with codes. So, you avoid any possible mistakes.

Perfect joints, no light gaps

With an innovative twist and lock joint element the assembly between two modules is now quick and easy and the profiles are strongly connected with no risk of bending. The light has absolutely no possibilities to escape.

And that's why we call it NLG - No Light Gap.

Perfect joints, no light gaps

End cap eliminates gaps which occur with the expansion of the material when its warmed, prevents light from leaking and insects entering the luminaire.

Choose your colour

With Kalis, you add a statement to the design of your ambient. Choose from a range of colours to make your Kalis luminaire either blend in or stand out.

Choose the right diffuser

Use satin opal polycarbonate diffuser (SOP) for general illumination or soft-light prismatic optics (DPR) for task illumination.

Satin opal polycarbonate diffuser (SOP)

Soft-light prismatic optic (DPR)

Power-in position

By having standard type of modules, you are able to choose the power-in position that suits you best. If necessary, one big system can be reconfigured into more smaller ones with individual power-in points.

Flexible suspension points

The suspension can be moved along the luminaire to ensure optimal mounting on your ceiling. Holder for S and SDI versions is made of transparent polycarbonate and results in no light shadows on the ceiling.

In case of indirect illumination, suspension points are predefined.

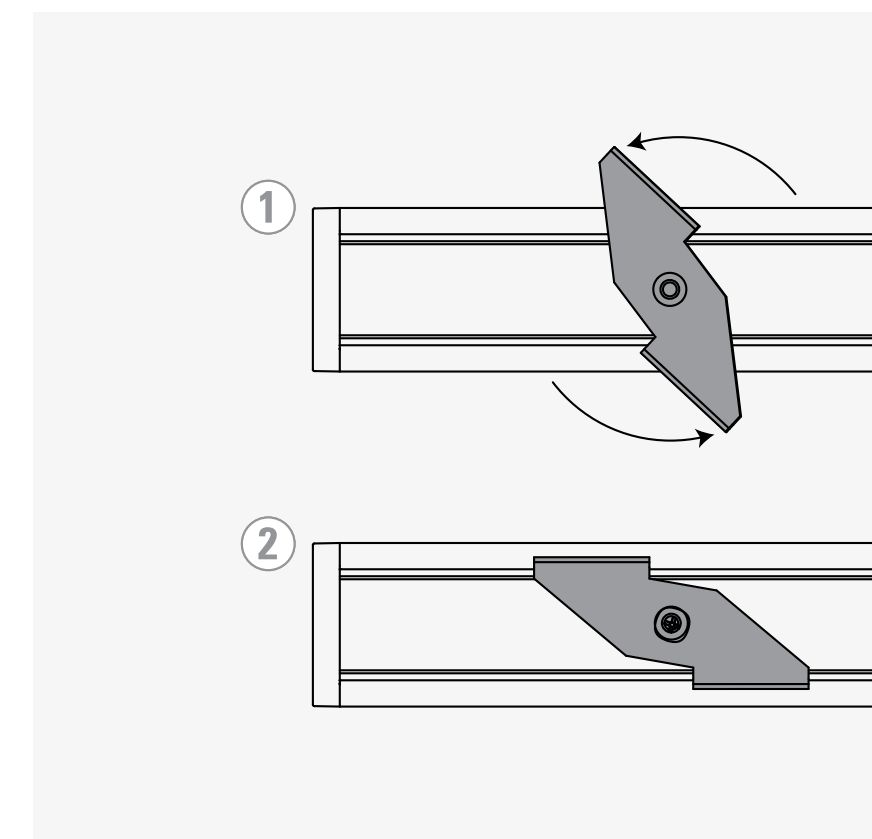

Kalis RI installation

For neutral and pure ceilings Kalis comes in recessed invisible version. The installation of the new trimless Kalis RI provides fast fixture mounting and clean looking illumination with no gap between the profile and ceiling. With the new RI profile the gap is completely filled with plaster.

Kalis RV installation

The installation of Kalis RV is simple and fast. All lines modules are fitted with magnets for fast fixing of led modules and optics with a click. Adjustable mounting bracket guarantee optimum fixing to false ceiling ranging from 11 to 20 mm (7/16" - 3/4") in thickness.

Easy to choose.
Easy to love.

universal

Light control

Wireless lighting control system Casambi offers a big variety of possibilities for a user to interact with the lighting. The app for smartphones and tablets is the most elaborated user interface. Besides the app, traditional wall switches, push buttons, Casambi's own scene controllers and many other control points can be used.

Made in Europe

Our products are carefully planned, manufactured and tested in order to ensure reliable operation throughout their life span, to limit the environmental impact as little as possible and to co-create pleasant living conditions. Quality is our highest priority and way of life.

High standards and reliable quality of our products were certified by numerous organisations.
