Creative. Unique. Yours.

Be creative. Mix and match your favourite combination of five different shapes and trendy colour range to create something unique, only yours. Finest materials, green technologies and sophisticated production reflect in top-notch design.

Whether you are planning a home, a restaurant, a hotel or a store, Zoe finds its place in minimalistic, Scandinavian and urban interiors and turns it into something truly beautiful.

Five ageless shapes

The designer chose to play with the most basic geometric figures: a cone, a half-sphere, and a cylinder, which are all rounded and harmonizingly sized. All the five shapes are carefully designed to fit perfectly with each other, whichever two shapes one chooses to combine.

Play with shapes and colours

Zoe comes in both single and double module and is a mix and match concept luminaire, not only by shape, but also by colour. It can either stand out by bold combinations or blend in as an adaptable chameleon. Use your imagination and creativity and make combinations that create a playful vibe in the space.

Internal funnel colour

Match or enhance your interior design with an internal funnel of a different colour. By default, it comes in the same colour as the bottom part of the luminaire. While you can also choose between the white or gold colour finish.

Carefully designed

Zoe boasts seamless joints either between two shapes but also between the power cable and the luminaire itself.

Finest materials

Zoe is made from the finest, recyclable materials. The body is aluminum, coated with fine matte finish colour which doesn't chip off. While the elegant, soft touch PVC power cable becomes a decorative element as well, seamlessly flowing into the luminaire. The light source is a high-quality LED COB with many possibilities of colour temperatures.

Colour personalization

Zoe can either stand out by bold combinations or blend in as an adaptable chameleon. It is a mix and match concept luminaire, not only by colour, but also by shape. While it moreover comes in both single and double module. Choose between various colours and make combinations that create a playful vibe in the space.

Other colour options are available on request, but minimum required quantity must be met.

Playful.
Creative.

Light control

Wireless lighting control system Casambi offers a big variety of possibilities for a user to interact with the lighting. The app for smartphones and tablets is the most elaborated user interface. Besides the app, traditional wall switches, push buttons, Casambi's own scene controllers and many other control points can be used.

Made in Europe

Our products are carefully planned, manufactured and tested in order to ensure reliable operation throughout their life span, to limit the environmental impact as little as possible and to co-create pleasant living conditions. Quality is our highest priority and way of life.

High standards and reliable quality of our products were certified by numerous organisations.
