

# **Black Hole**

Extreme phenomenon

Intra lighting, Šempeter pri Gorici, Slovenia / Interior design: Notio

Fabiani Business Hotel, Vienna, Austria / Architecture: AKSL arhitekti / Photography: Studio Spacer

# Its perfection absorbs you.

This is a story of how the light found the way out of the black hole to enlighten your space. Black Hole is a perfect luminaire for all your galaxies – home, office, hospitality. Because of its size and distinct look it has absolutely no chance to stay invisible.

It is multifunctional. It offers different possibilities of illumination. The acoustic surface reduces noise and improves speech audibility. With its integrated Bluetooth loudspeaker, you can listen to your favourite music and its sophisticated design brings a touch of luxury to your space. Last but not least, the atmosphere it creates might help you find the way out, whenever you feel stuck in a black hole.

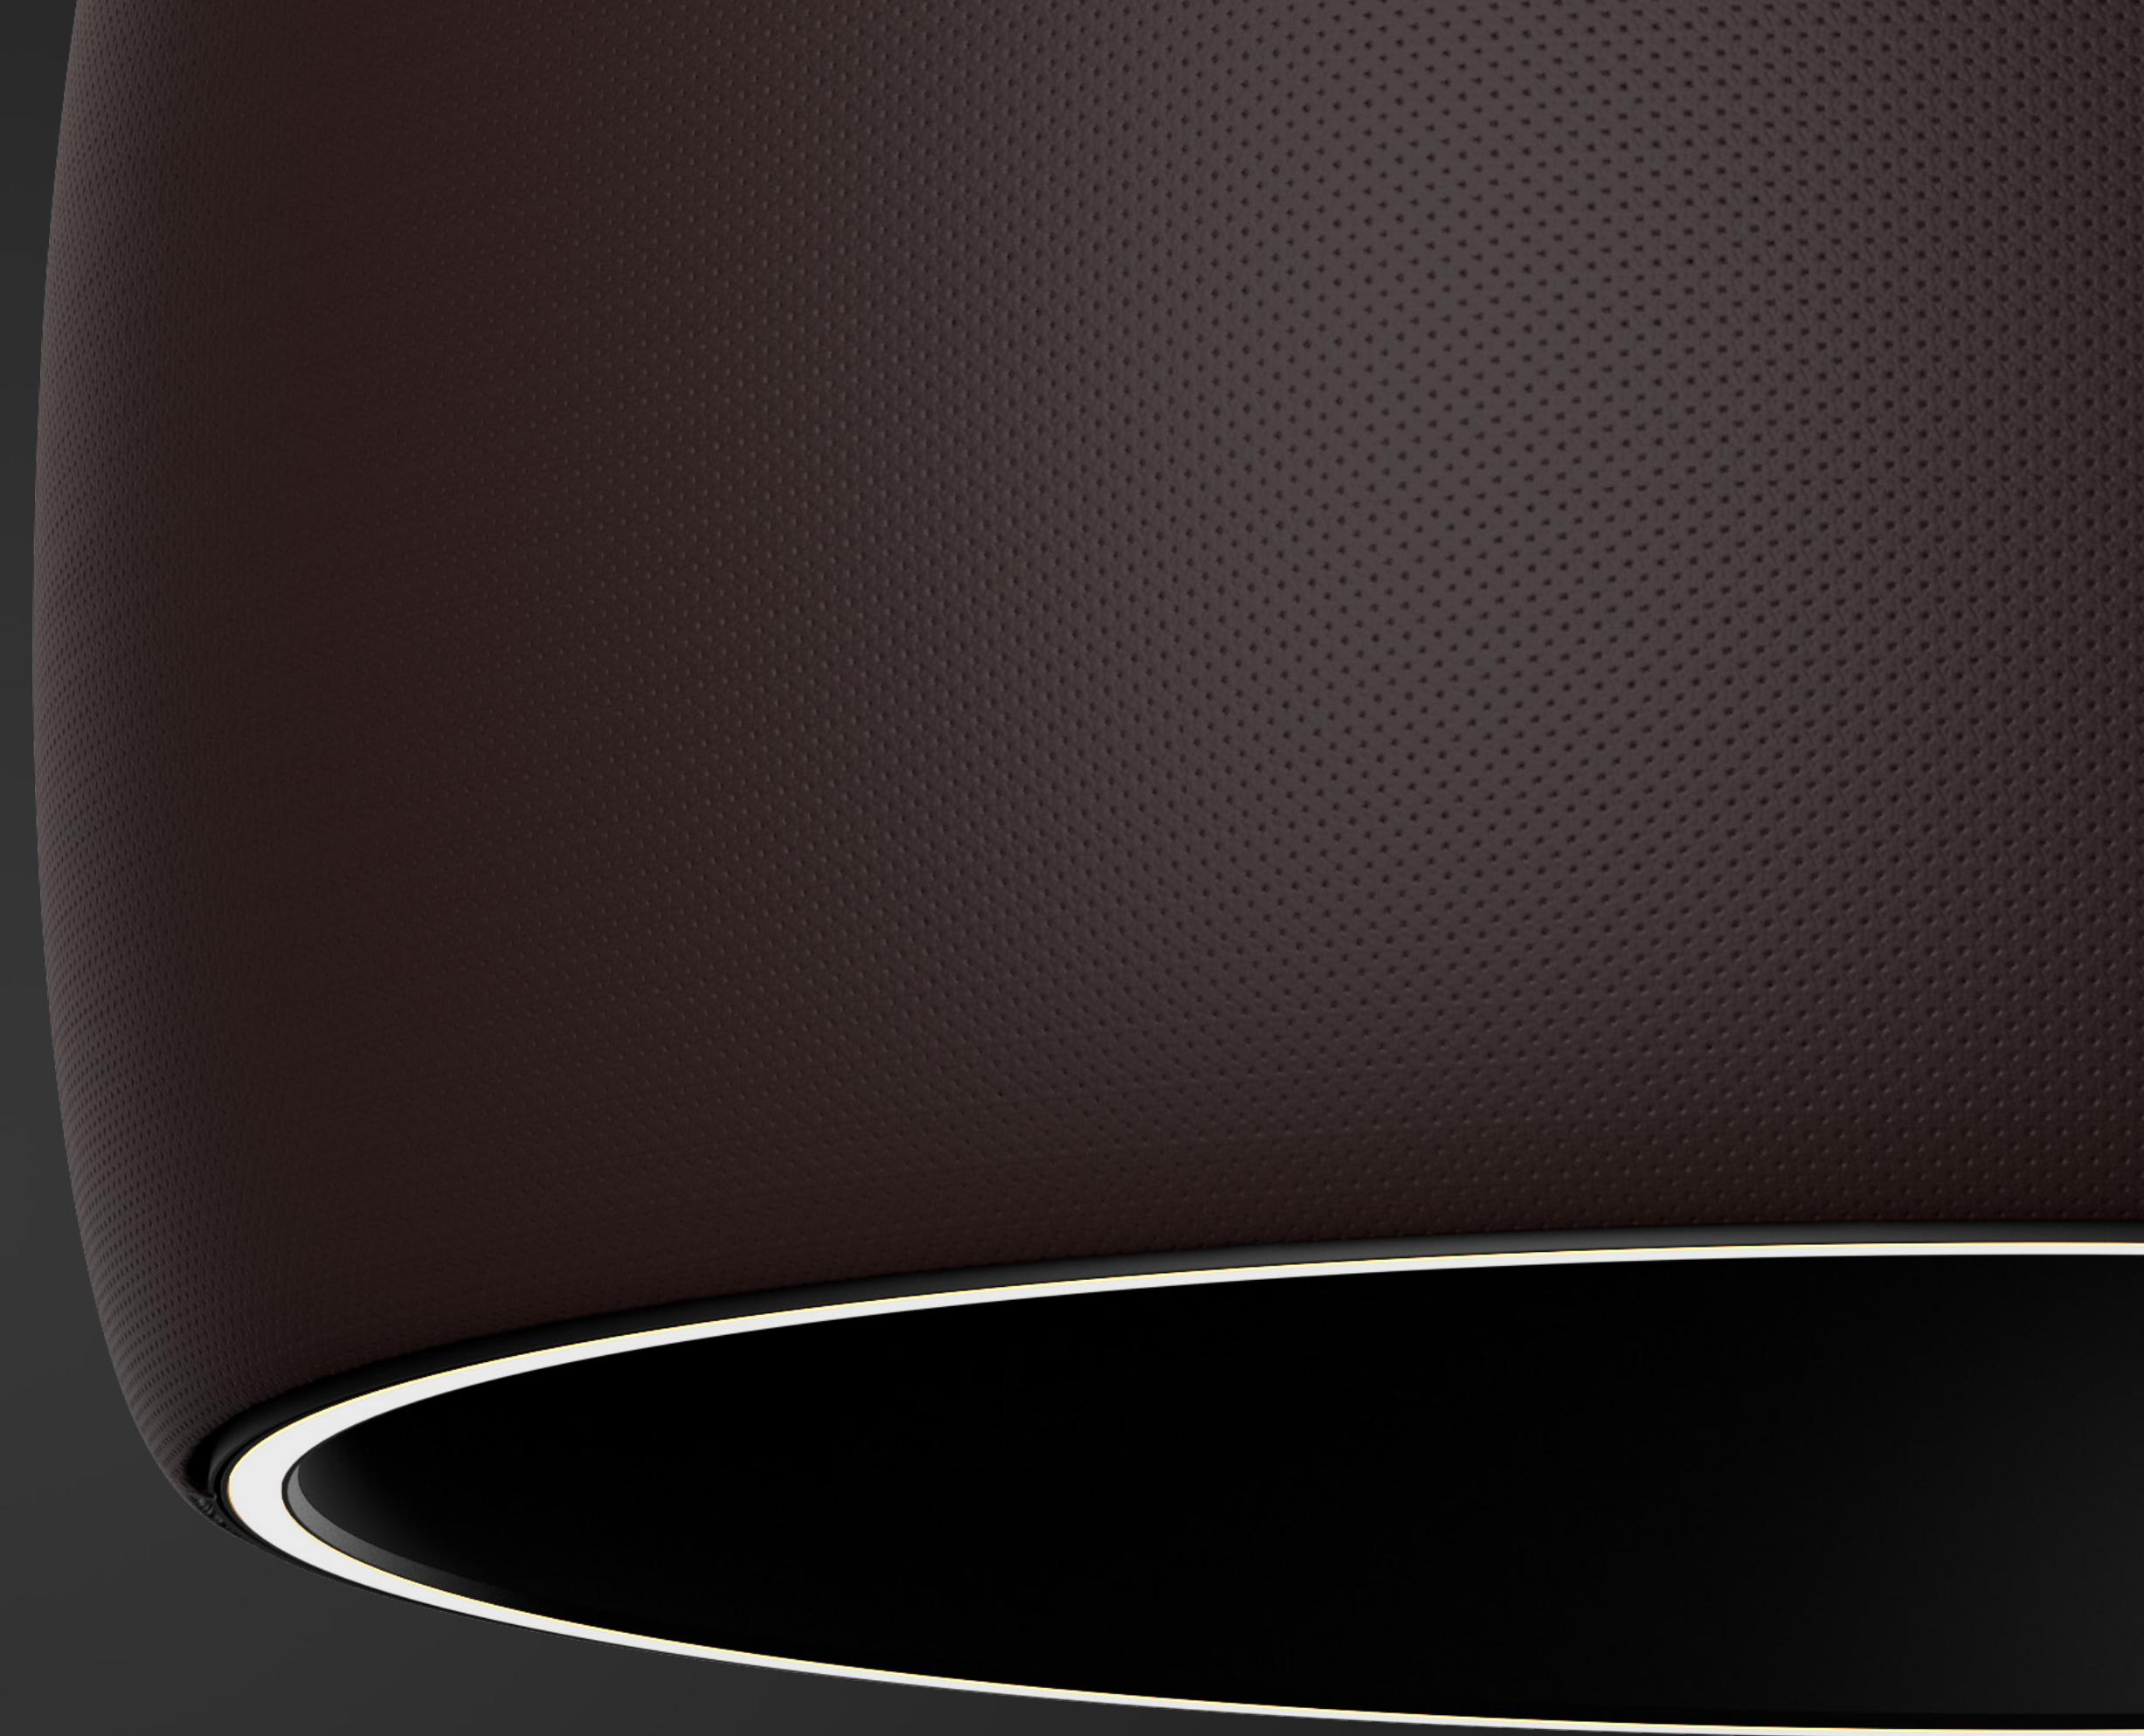

**DESIGN:**

Lorenzo Truant

# **A touch of luxury**

Black Hole is different from other lamps, even at a glance. The appearance of softness and roundness perceived by the eye without the help of touch is immediately felt as reassuring.

# Black but colorful

Choose from various colours. Match it with the furniture. Or not. If you decide for a complete contrast, Black Hole will stand out even more.

## LUMINAIRE LUMINOUS FLUX:

4400 - 4800 lm

## LED COLOUR

927, 930, 940

## DRIVER

Casambi, DALI, TD

## MATERIAL

Perforated eco leather

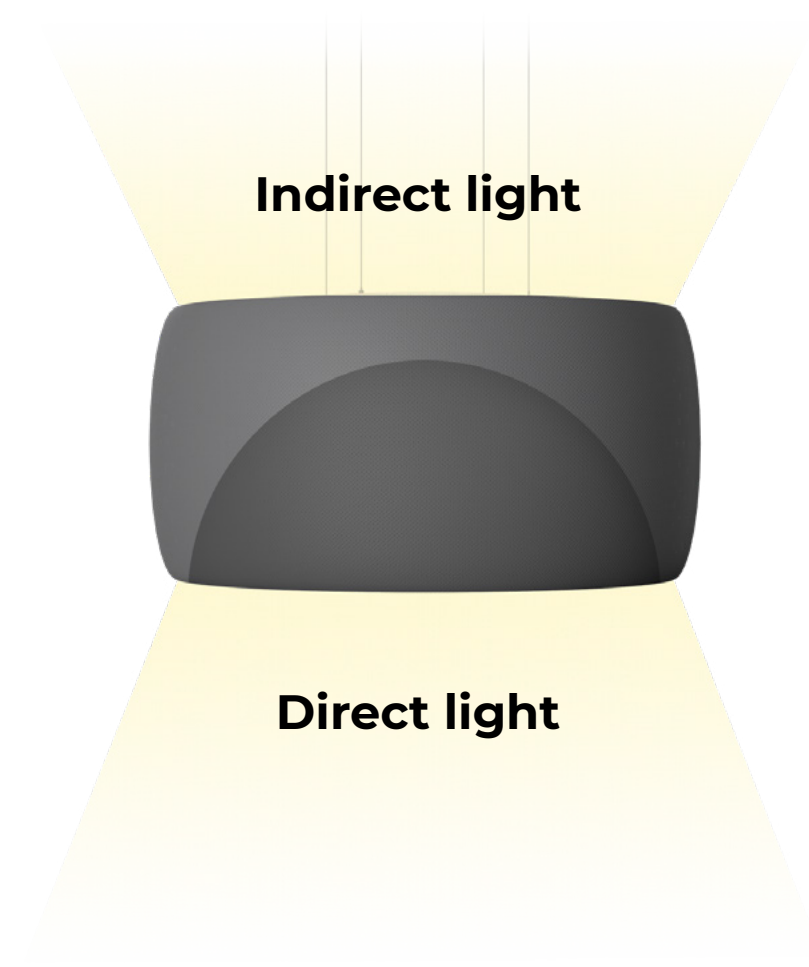

# Bluetooth sound system

You can listen to your favourite music through its integrated bluetooth loudspeaker simply using bluetooth connection.

# Dome-shaped black interior

It creates the essence of Black Hole, where you lose the sense of the product deepness. Direct-indirect illumination can be switched or dimmed separately, making this luminaire a perfect fit for your changing needs.

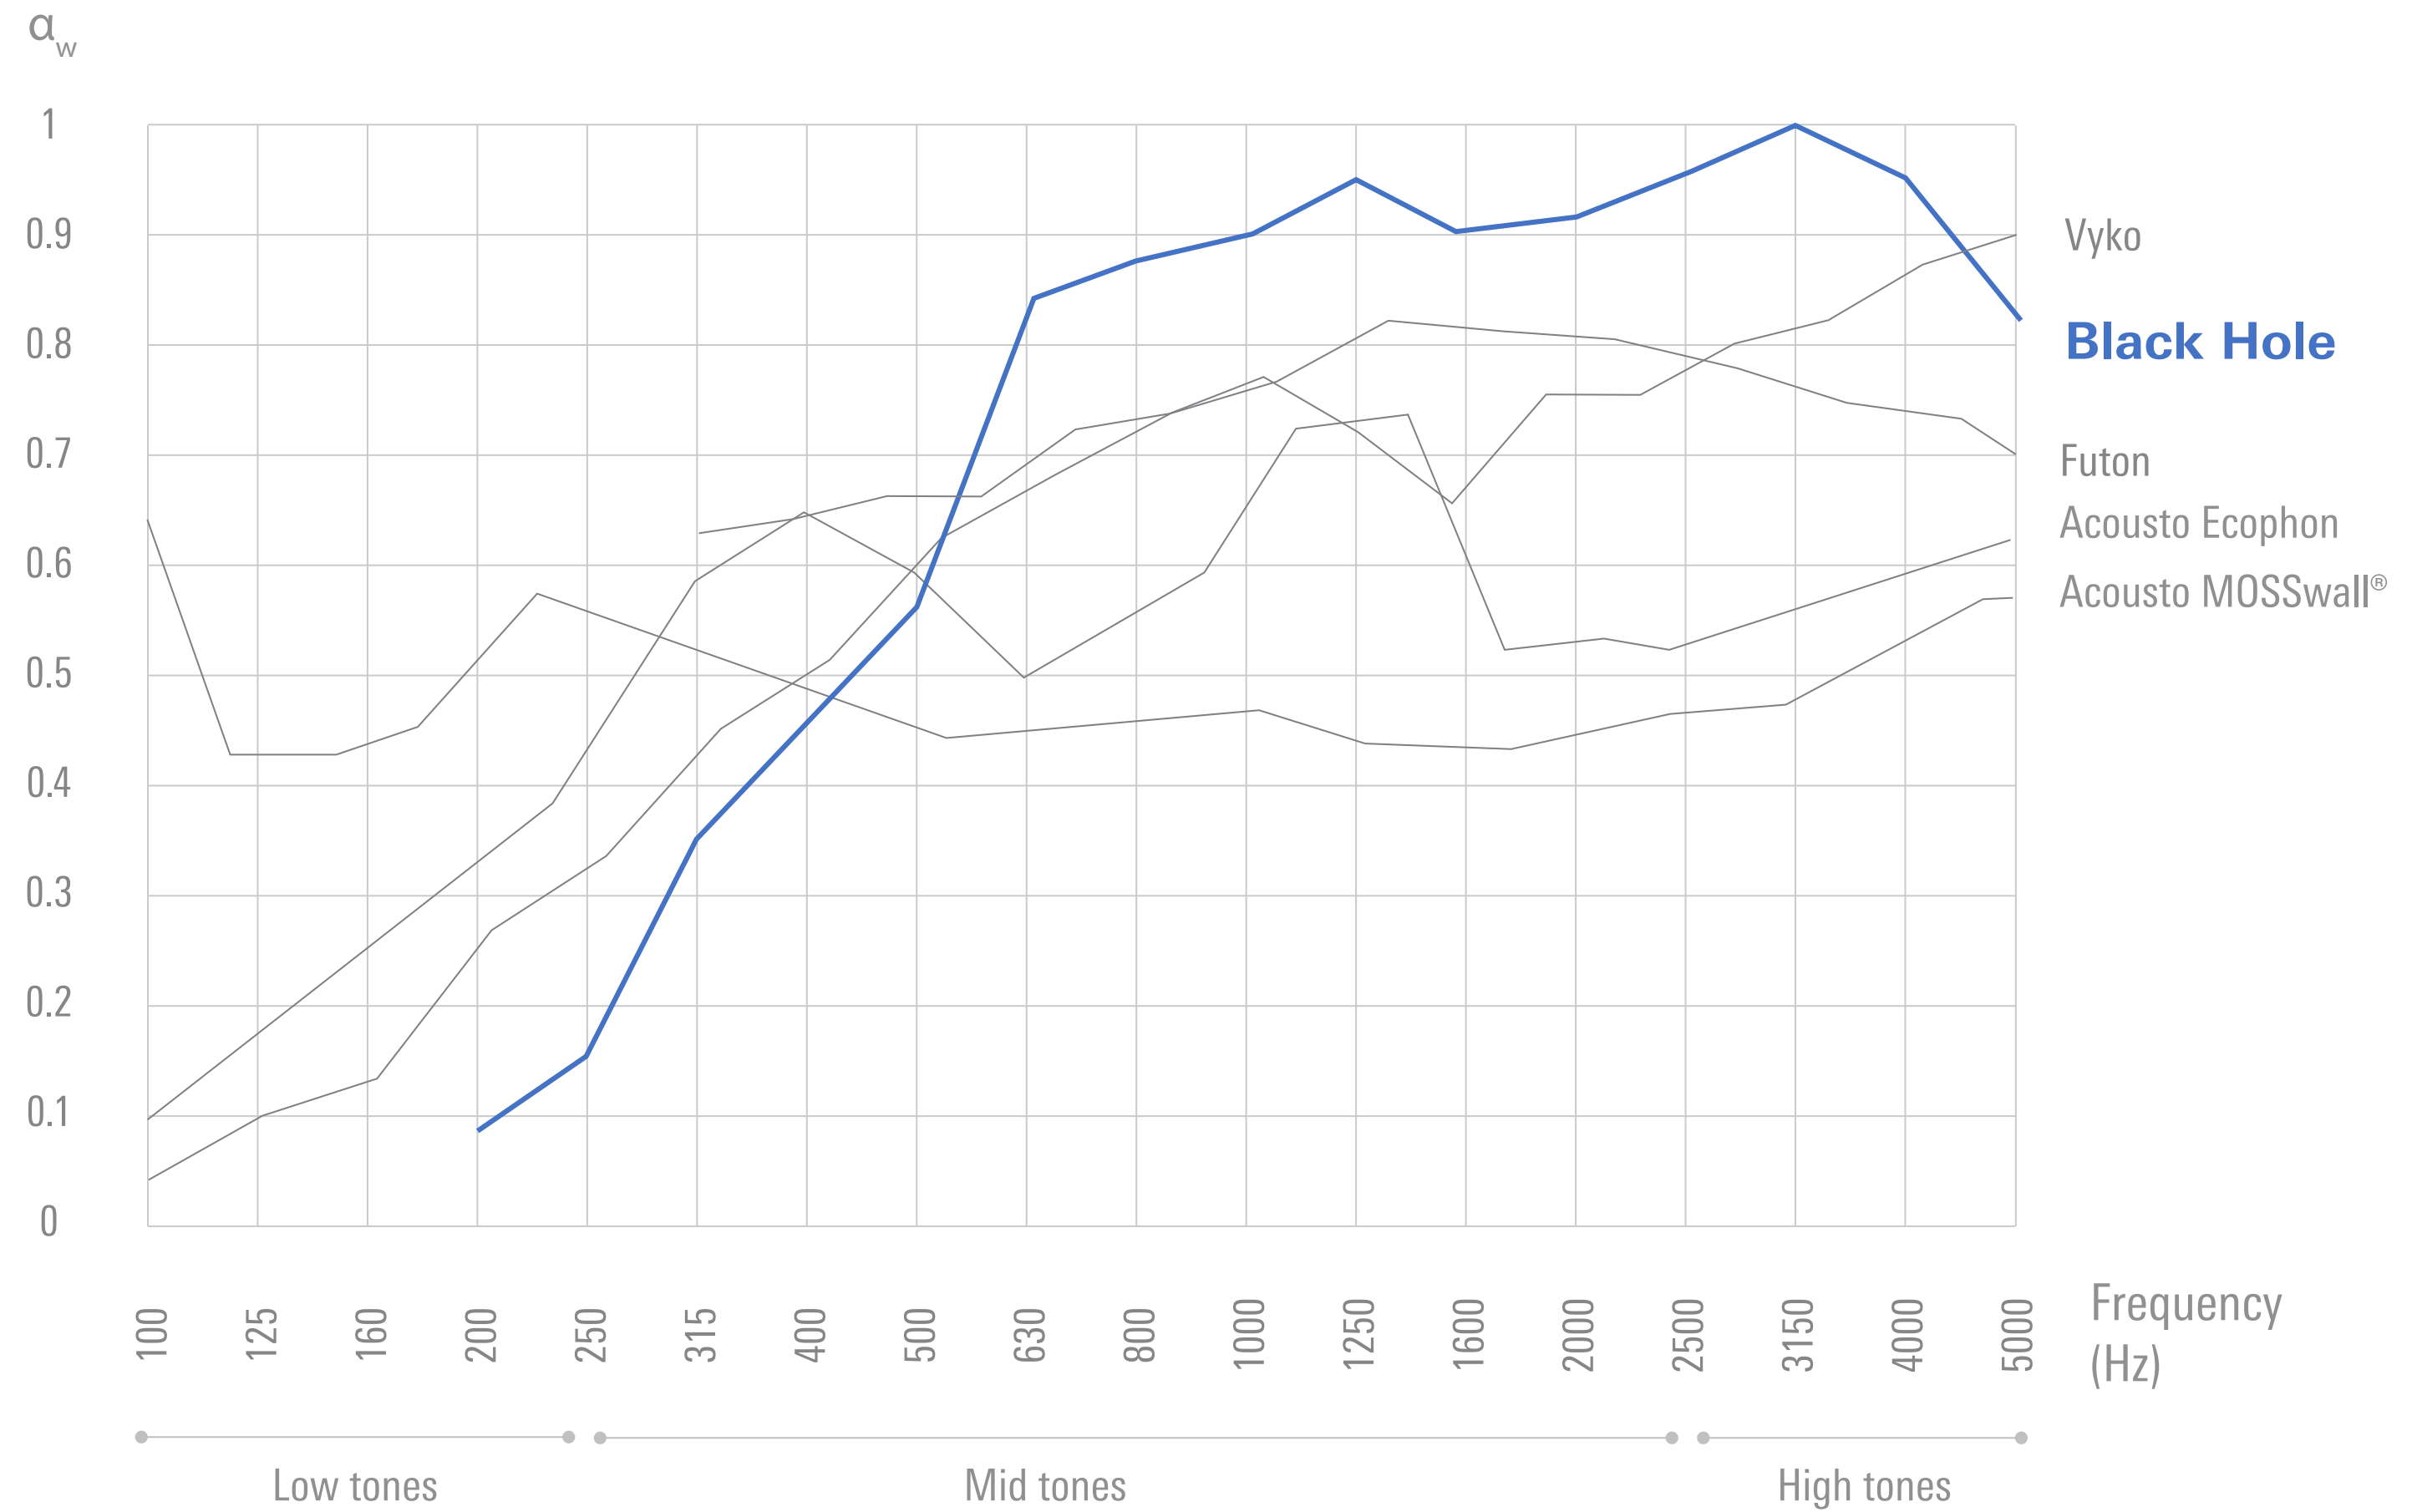

# No noise pollution

The noise level in a space has an impact on the well-being and performance of people. The big acoustic surface of Black Hole reduces the noise pollution in the space.

Low tones   Mid tones   High tones

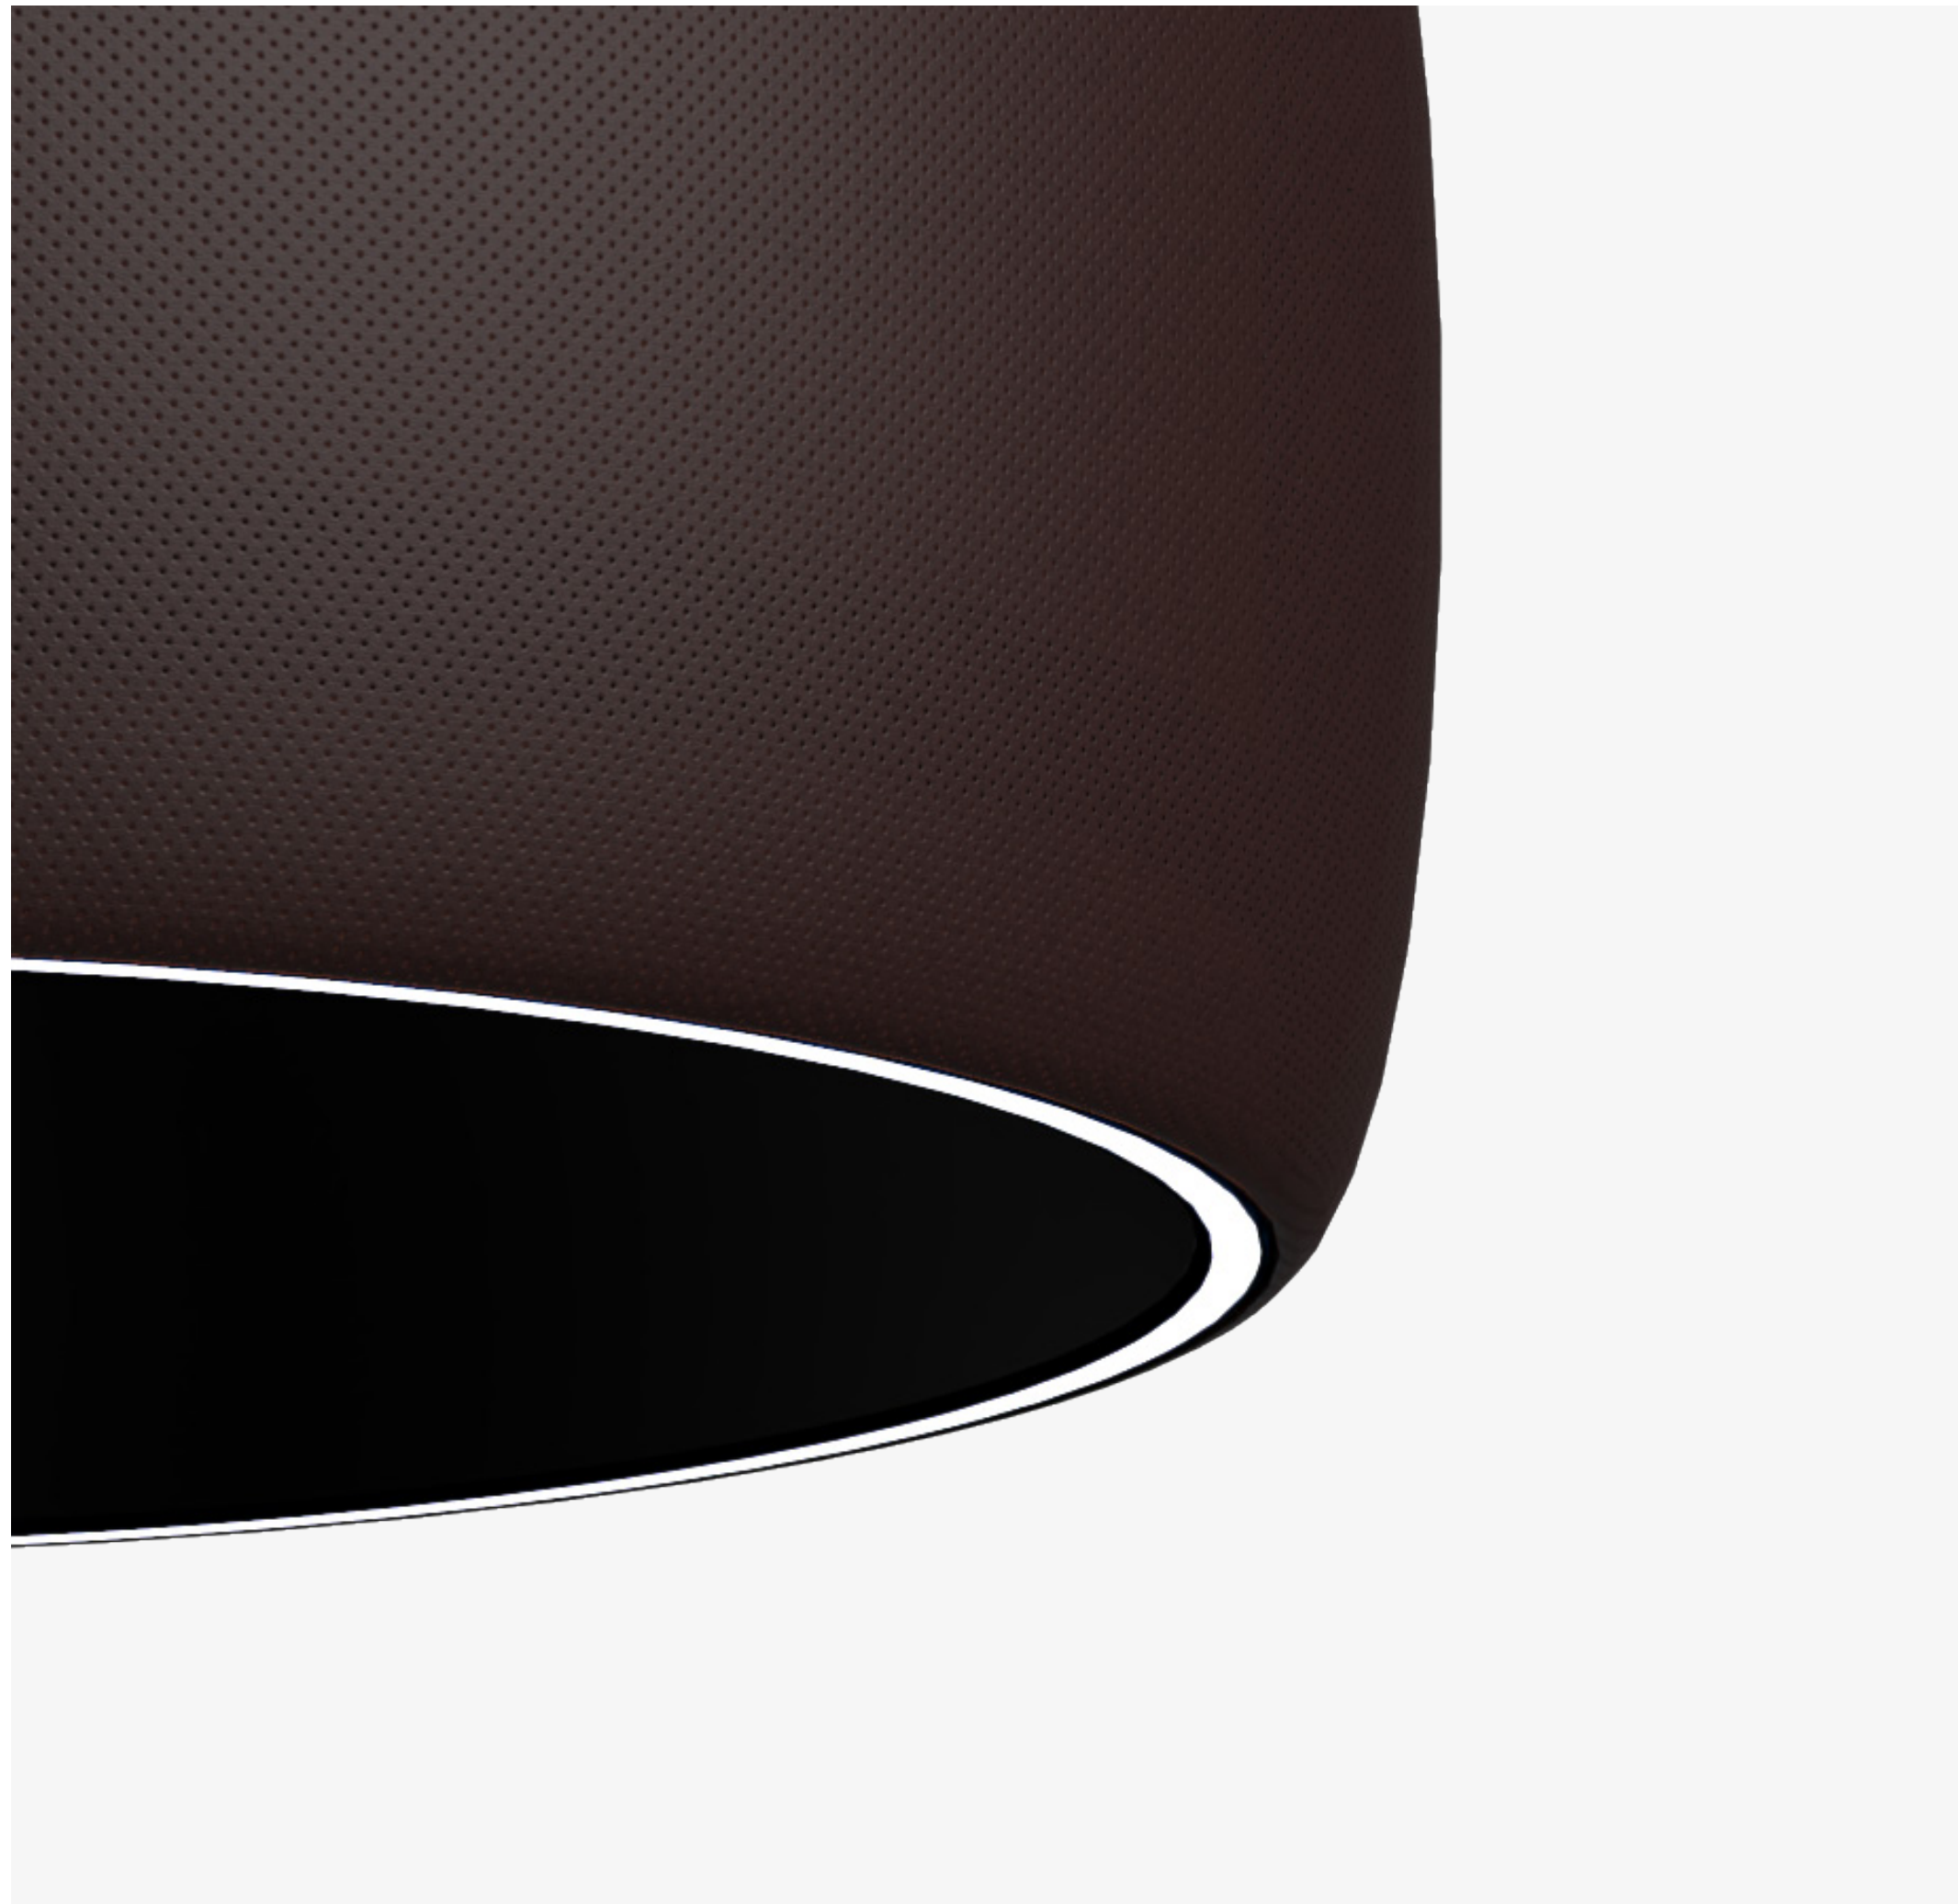

# An absolute fullness of matter

Lorenzo Truant, Designer

I have always been attracted by astronomy and it's historical evolution. Black holes, in particular, are a concept that enchants me. The luminaire's affinity with the black hole concept is conceptual and visual.

The annular light source that develops around the dark space represents the photon sphere orbiting the black hole which, rather than a void, means, in reality, an absolute fullness of matter. "
