Acoustic. Mirror. O. Three versions of thin elegance.

Futon comes in three versions. All different all unique all multipurpose.

Futon Acoustic is perfect when you want to combine unique ambient lighting, functionality of acoustics and trendy colours. Futon O, a shining ring, makes your walls shine in a different way, while Futon Mirror is a mirror and a lamp all-in-one. Alone or in a creative composition, Futon gives its best.

Mirror

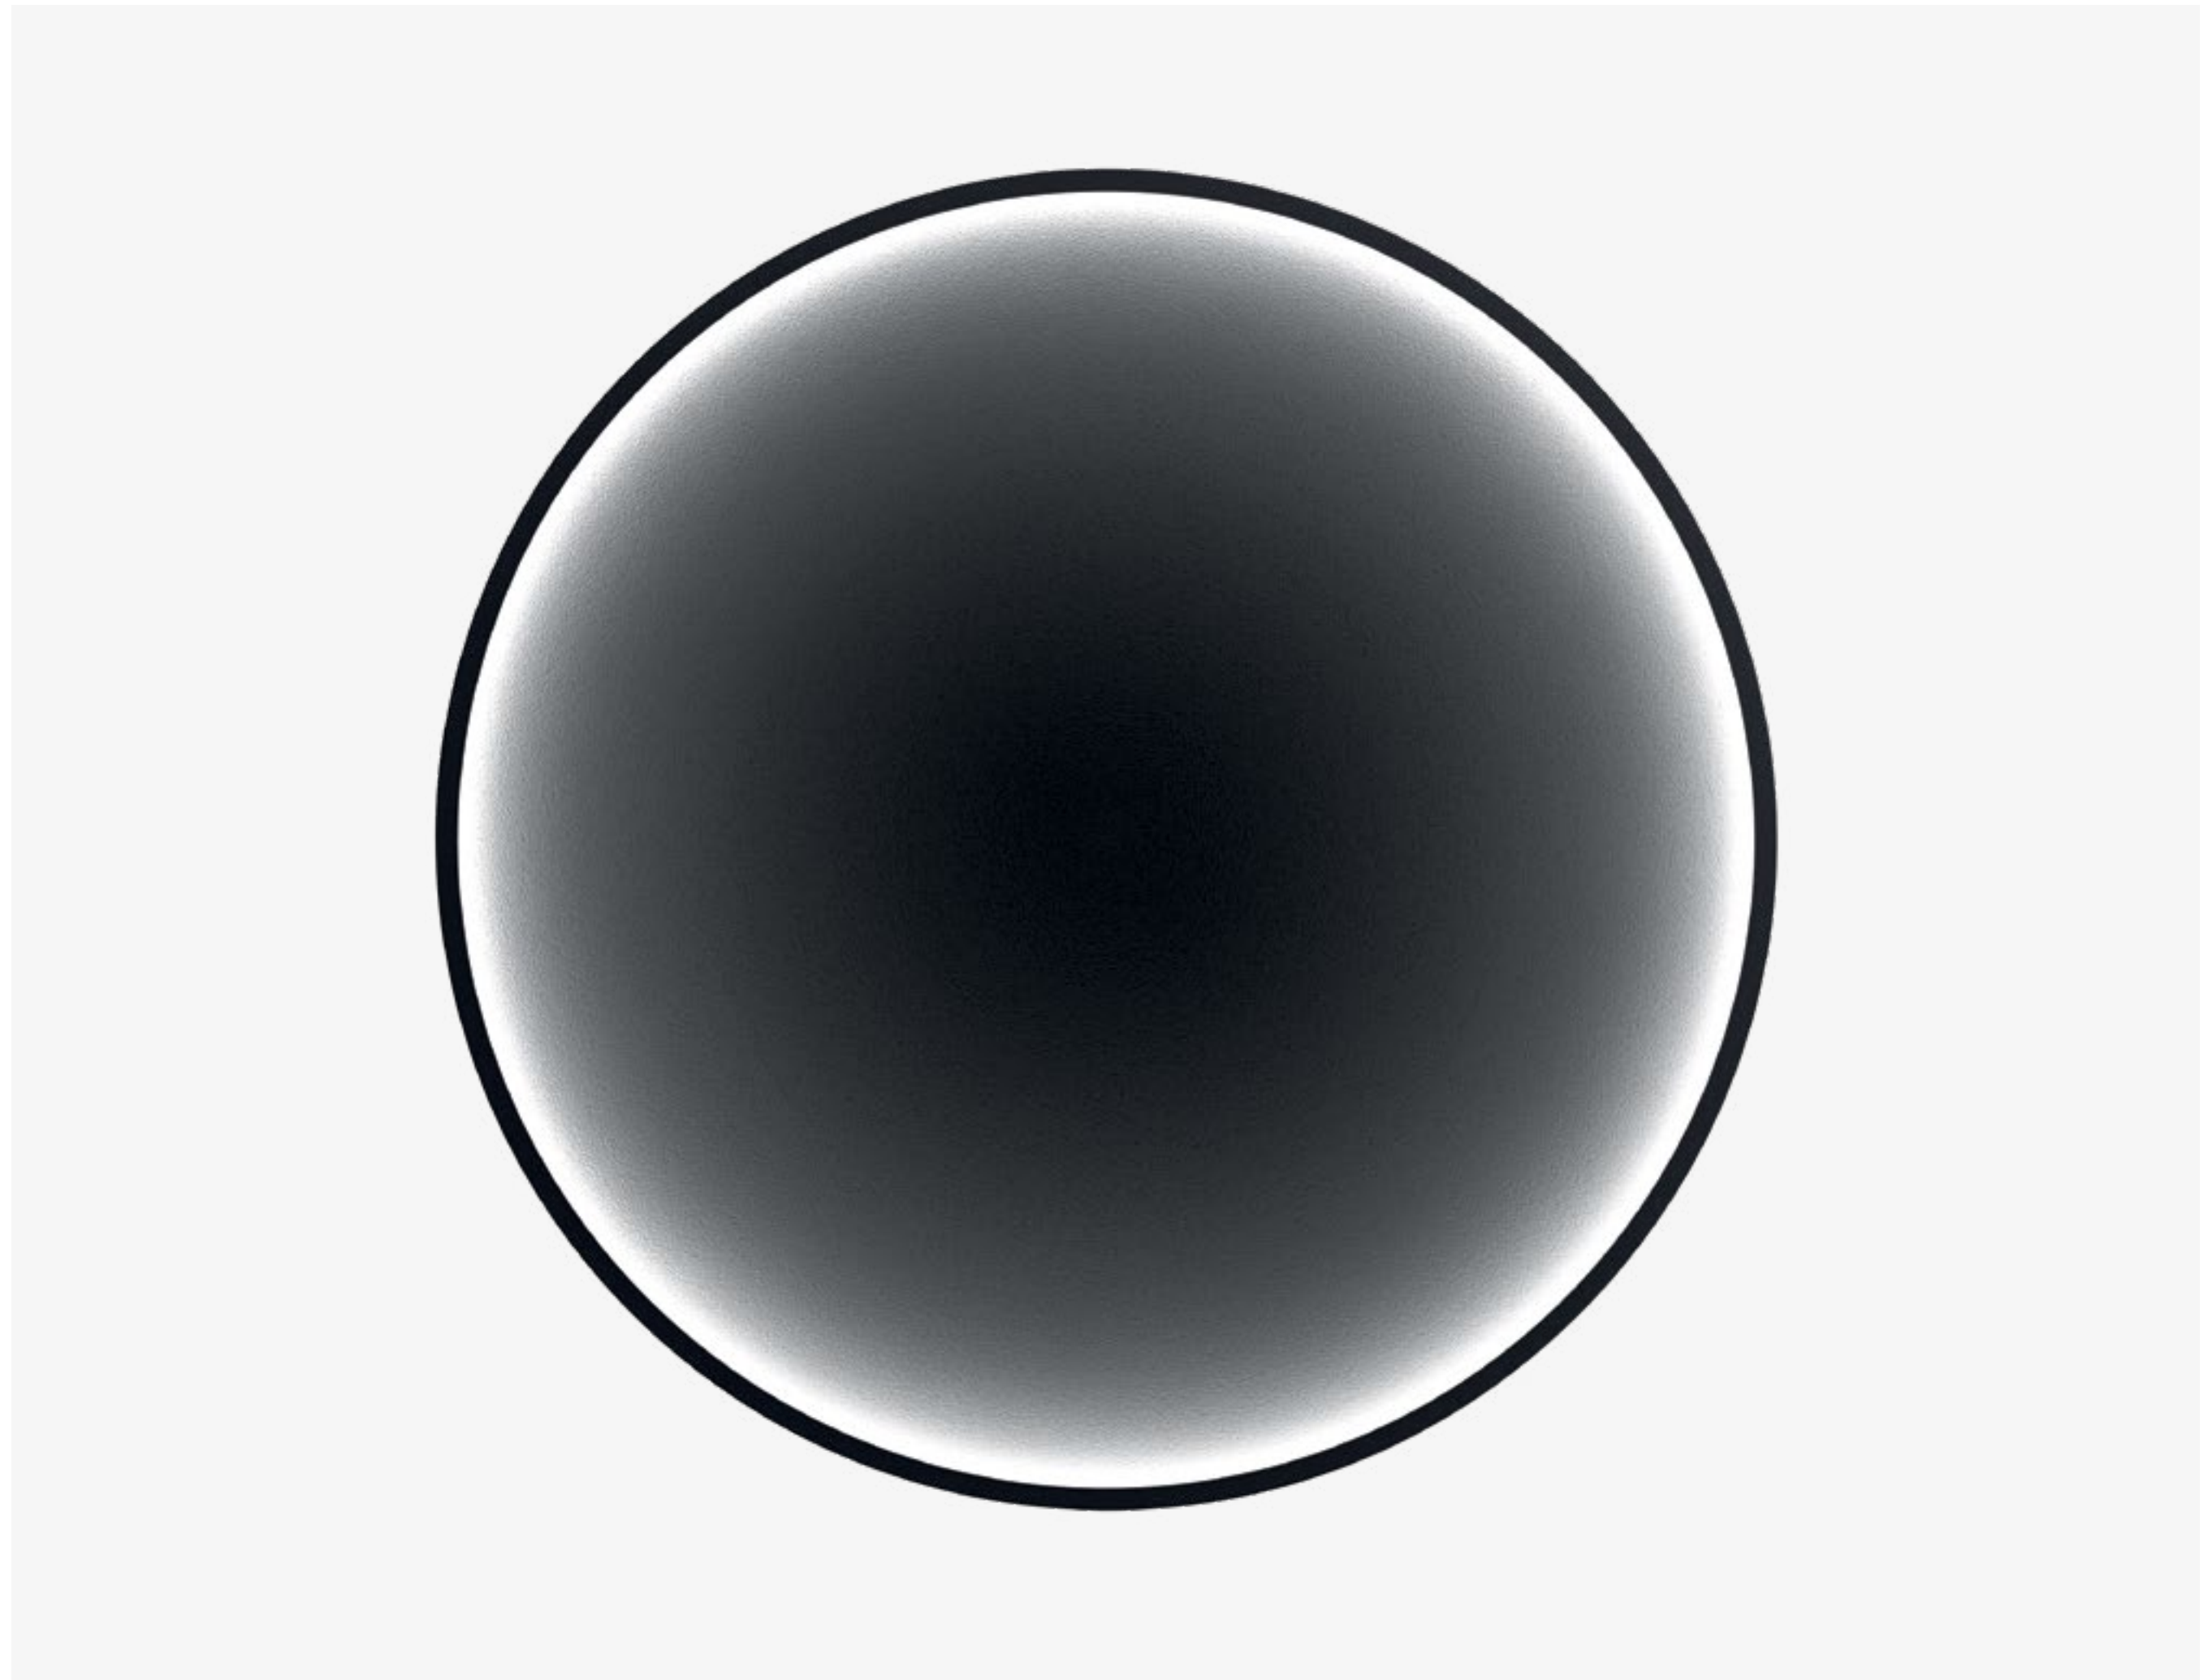

Thin performer

Futon is one of the favourite picks for interior designers. Think about it when you're building a designer restaurant, a hotel or a common space at the university.

Rich in light effect

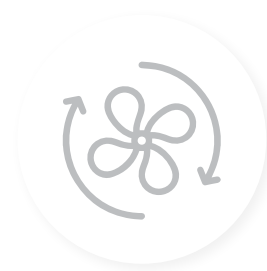

The hidden light source illuminates sound absorbing acoustic panel from the inner edge. Subsiding evenly, it creates a rich glow effect on the fabric and diffuse the light in the space.

Maximum acoustic comfort

Futon enables effective soundproofing and sound absorbing in all areas with higher frequencies.

Acoustic absorption: Class B

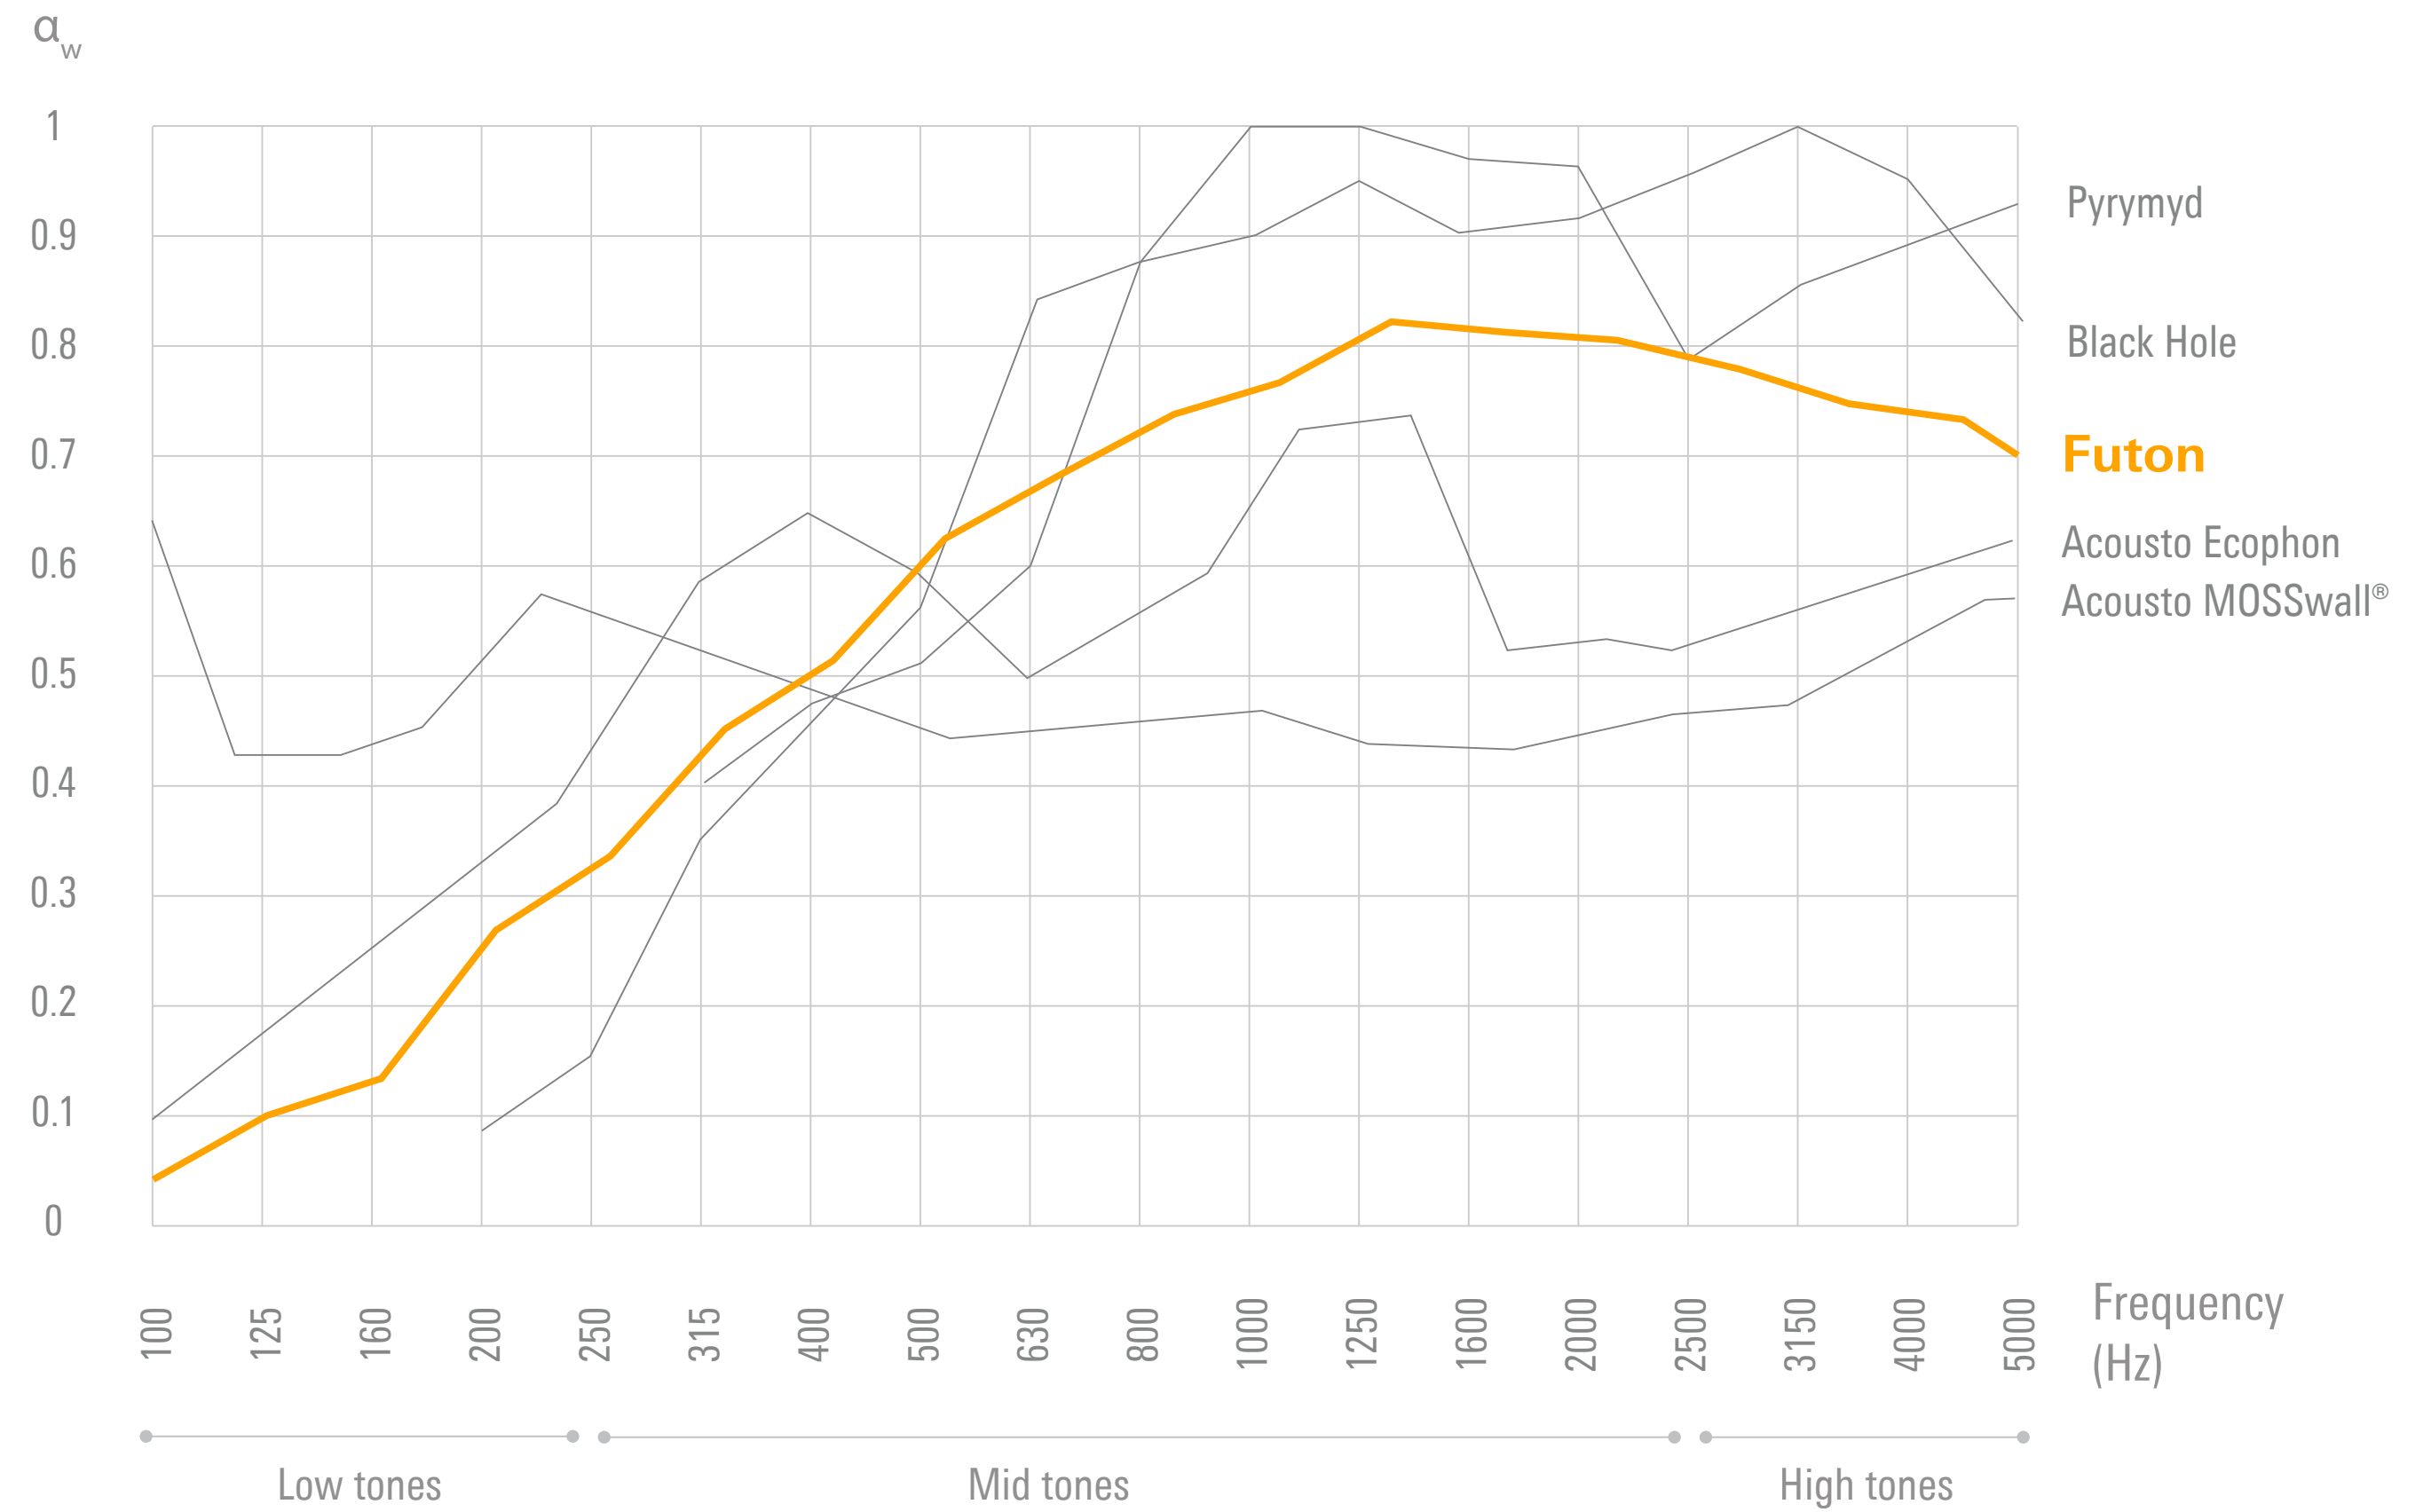

Low tones

Mid tones

High tones

Pick your colour. Match your style.

It's a matter of colour. And the colour is a matter of choice. Both, the high-quality aluminium frame and the textile of the acoustic panel are available in various trendy colours. Choose the one that fits best to your interior. And keep in mind that the light effect of Futon is strongly connected with the colour of its textile panel.

Futon O

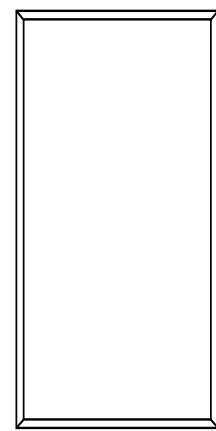

Futon O creates an entirely new atmosphere with different kinds of backgrounds. It emphasizes the structure of the wall.

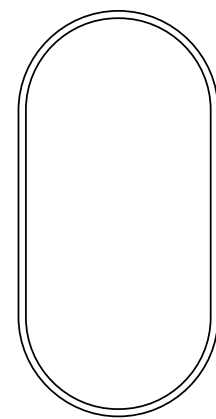

Perfect mirror illumination

Round wall mirror, integrated into the luminaire, elevates the look of your entryway or bathroom. The evenly distributed diffused light eliminates face shadows and gives you a perfect combination of functionality and good design.

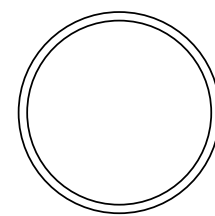

Futon mirror shapes

906 x 606 mm

1217 x 606 mm

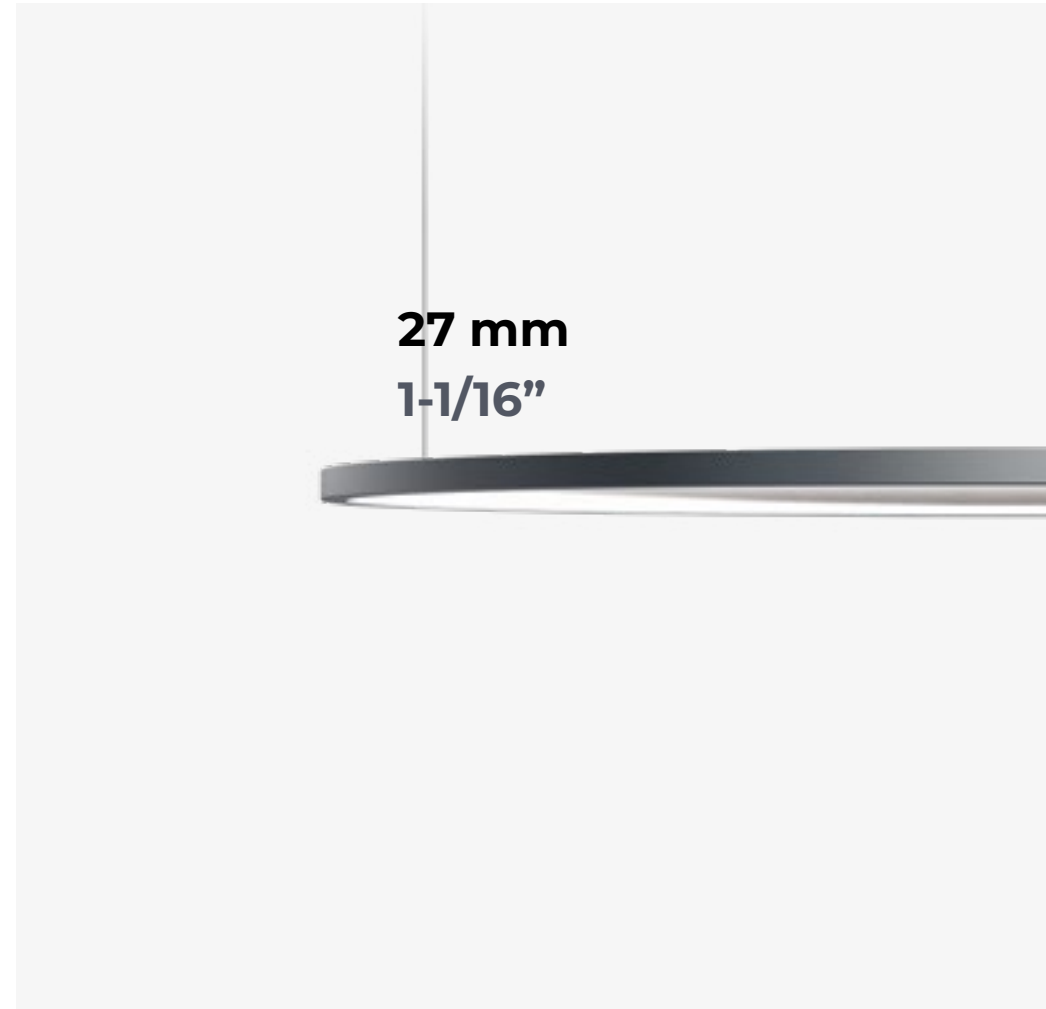

Ø 611 mm
Ø 900 mm

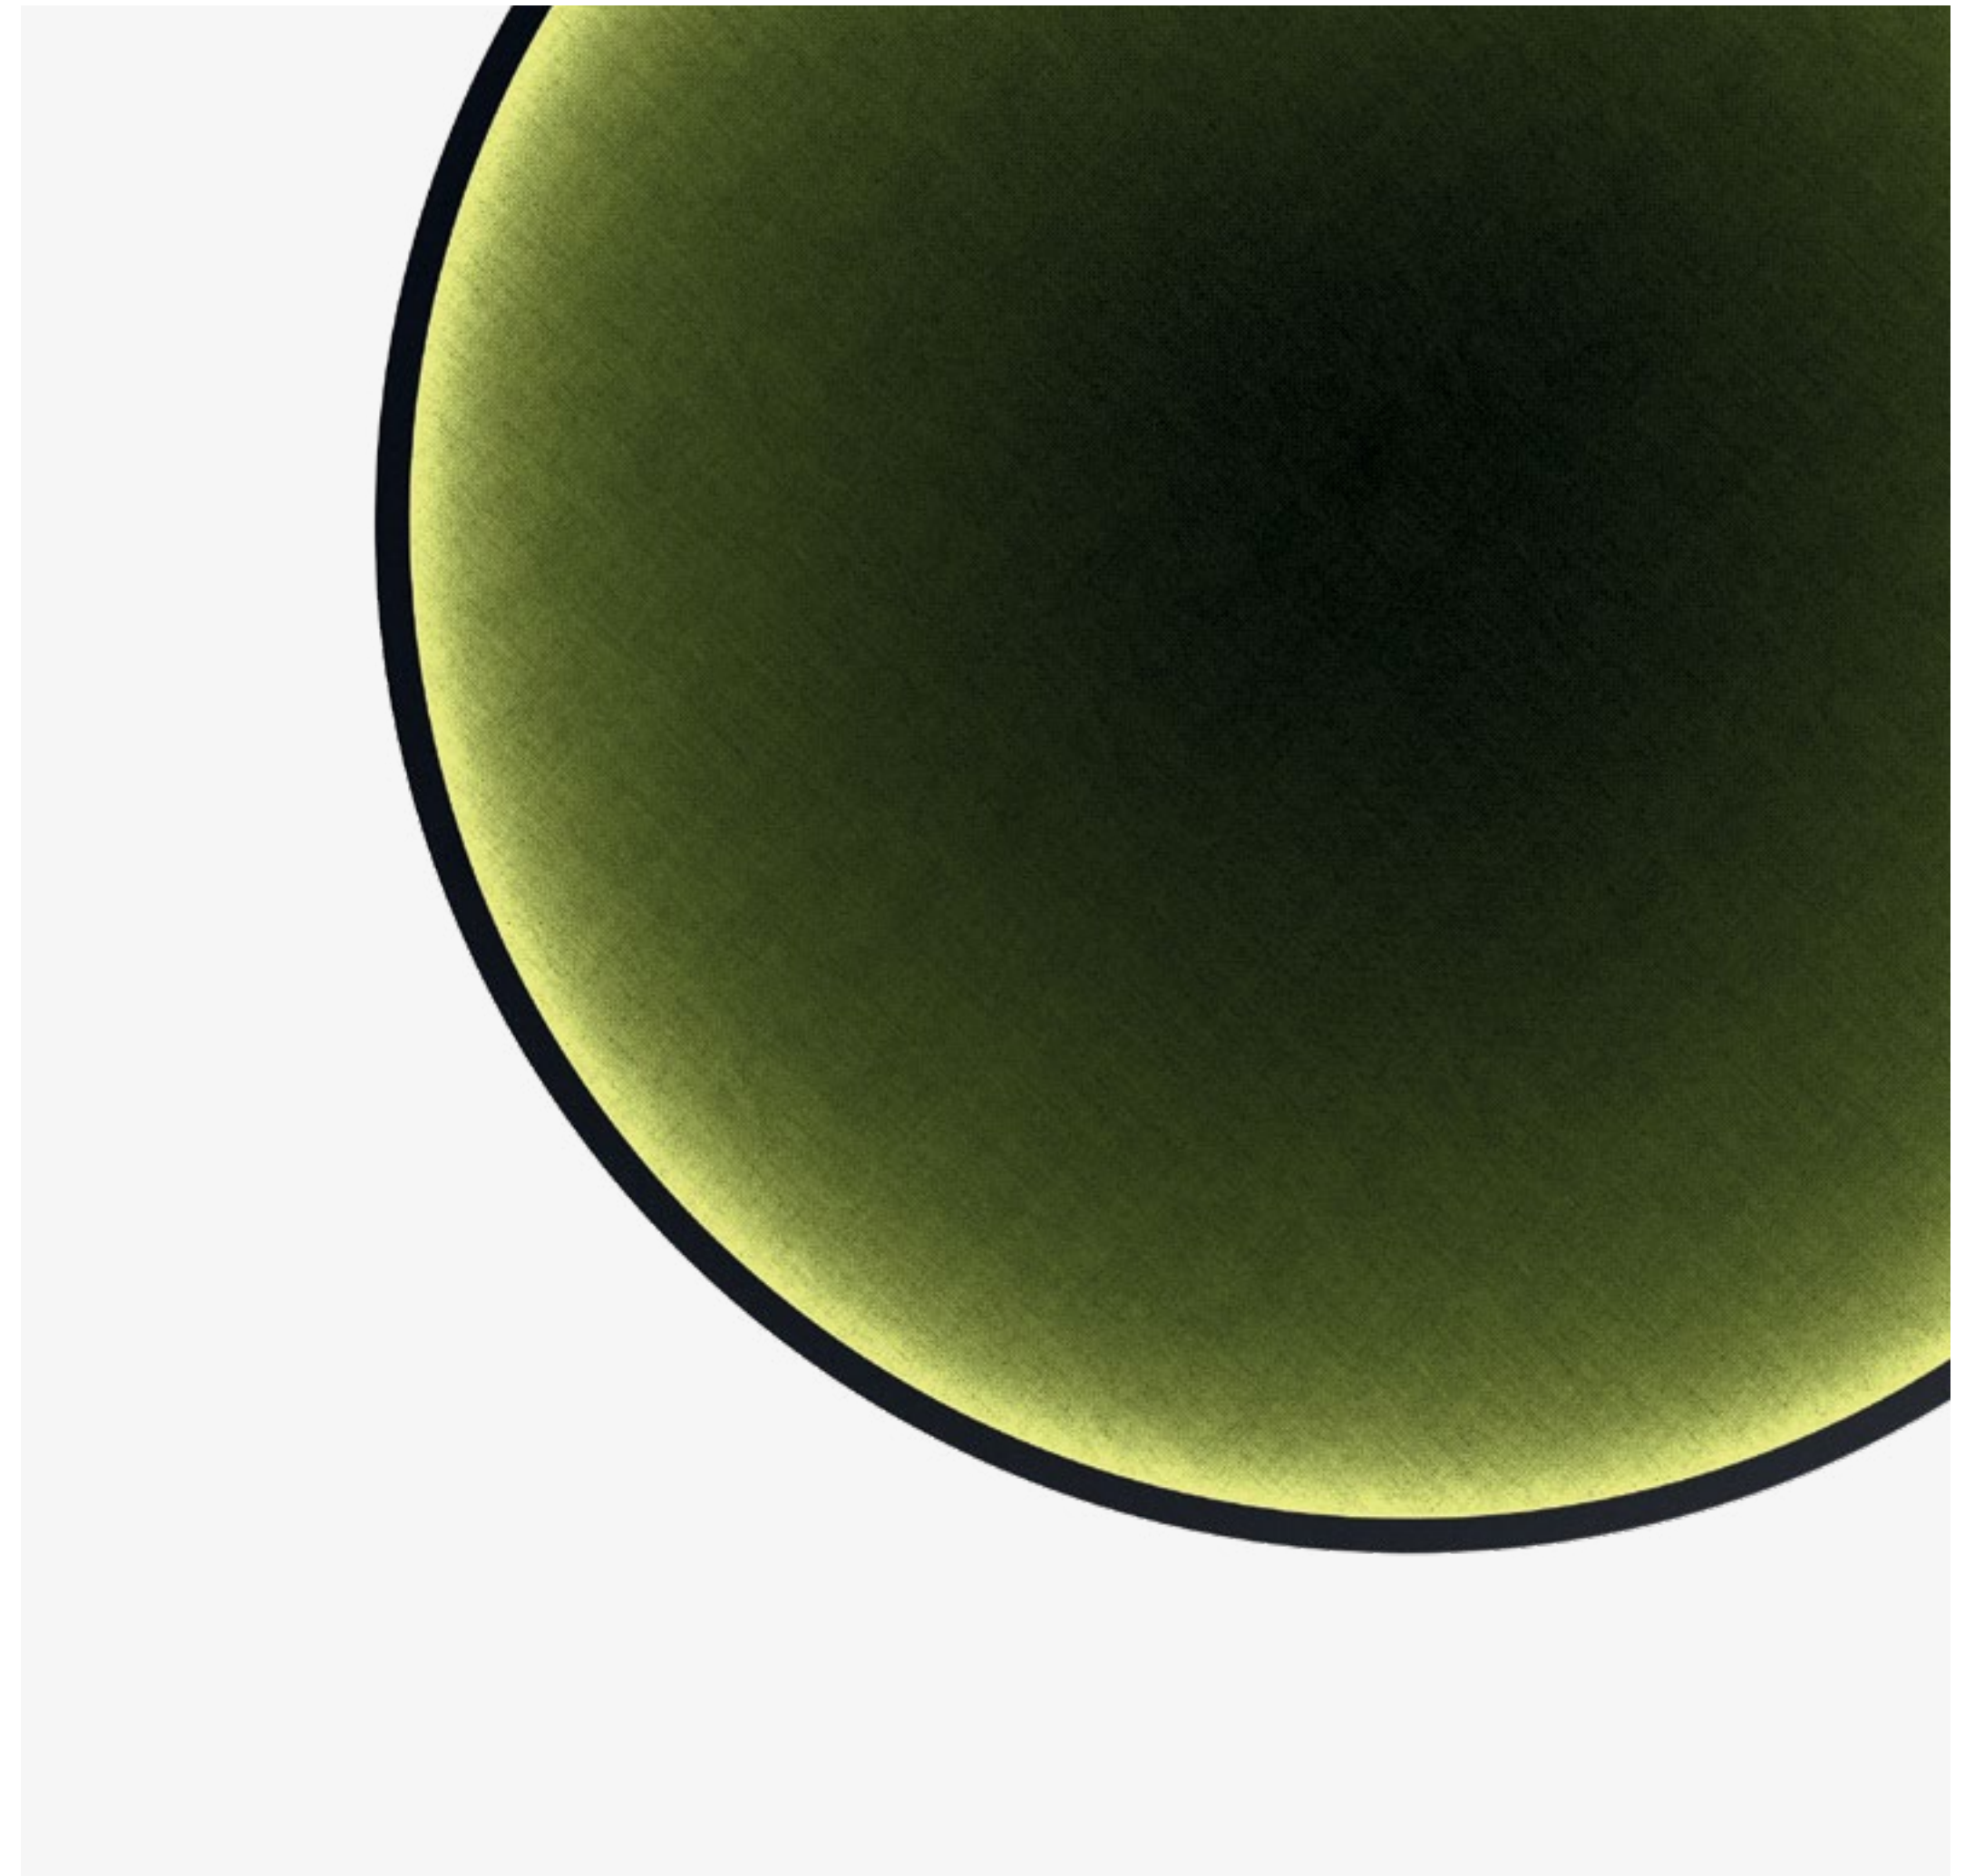

Futon Mirror with heater

This new version of Futon is ideal for bathrooms, especially those with inadequate ventilation. A special mirror demister warms up the mirror at 30-35°C (303,15 - 308,15 K), a perfect temperature to prevent the mirror surface from condensation of steam. You'll always have a crystal clear mirror surface. And be always able to see your face.

Light control

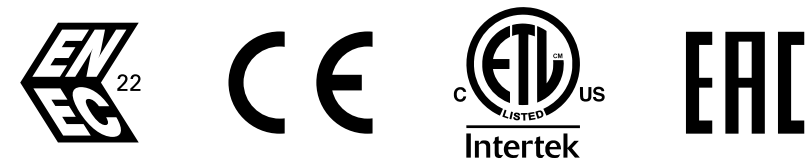

Wireless lighting control system Casambi offers a big variety of possibilities for a user to interact with the lighting. The app for smartphones and tablets is the most elaborated user interface. Besides the app, traditional wall switches, push buttons, Casambi's own scene controllers and many other control points can be used.

Made in Europe

Our products are carefully planned, manufactured and tested in order to ensure reliable operation throughout their life span, to limit the environmental impact as little as possible and to co-create pleasant living conditions. Quality is our highest priority and way of life.

High standards and reliable quality of our products were certified by numerous organisations.
