Keeps the noise down

In an open workspace there is nothing more annoying than noises you don't want to hear. But here comes Acousto, a luminaire that features acoustic panels providing excellent absorption of sounds, making your area not only quieter but also more intimate.

Think about Acousto when creating large open spaces with a majority of hard surfaces and an echo. Especially if you seek a different and green solution. The natural MOSSwall panels absorb the noise but also bring nature indoors and are maintenance free. How cool is that?

A glimpse of nature

Create a well-being atmosphere by using MOSSwall pannels that don't only absorb the noise but also bring the nature inside and are maintainance free. How cool is that?

100 % natural moss

MOSSwall® is produced from a natural lichen by using a 100% ecological application. It requires a 40 - 50% relative humidity level and does not appreciate direct sunlight. If the humidity drops below 40%, the lichens crystallize and dries, signalling the atmospheric change.

It's 100 % maintenance-free and certified as fire-resistant. MOSSwall® panel has a 3-year warranty.

Create your acoustic cloud

Think about Accusto when creating large and open spaces with a majority of hard surfaces and an echo, or when you simply seek for a different, efficient and green solution to effectively combat office noise.

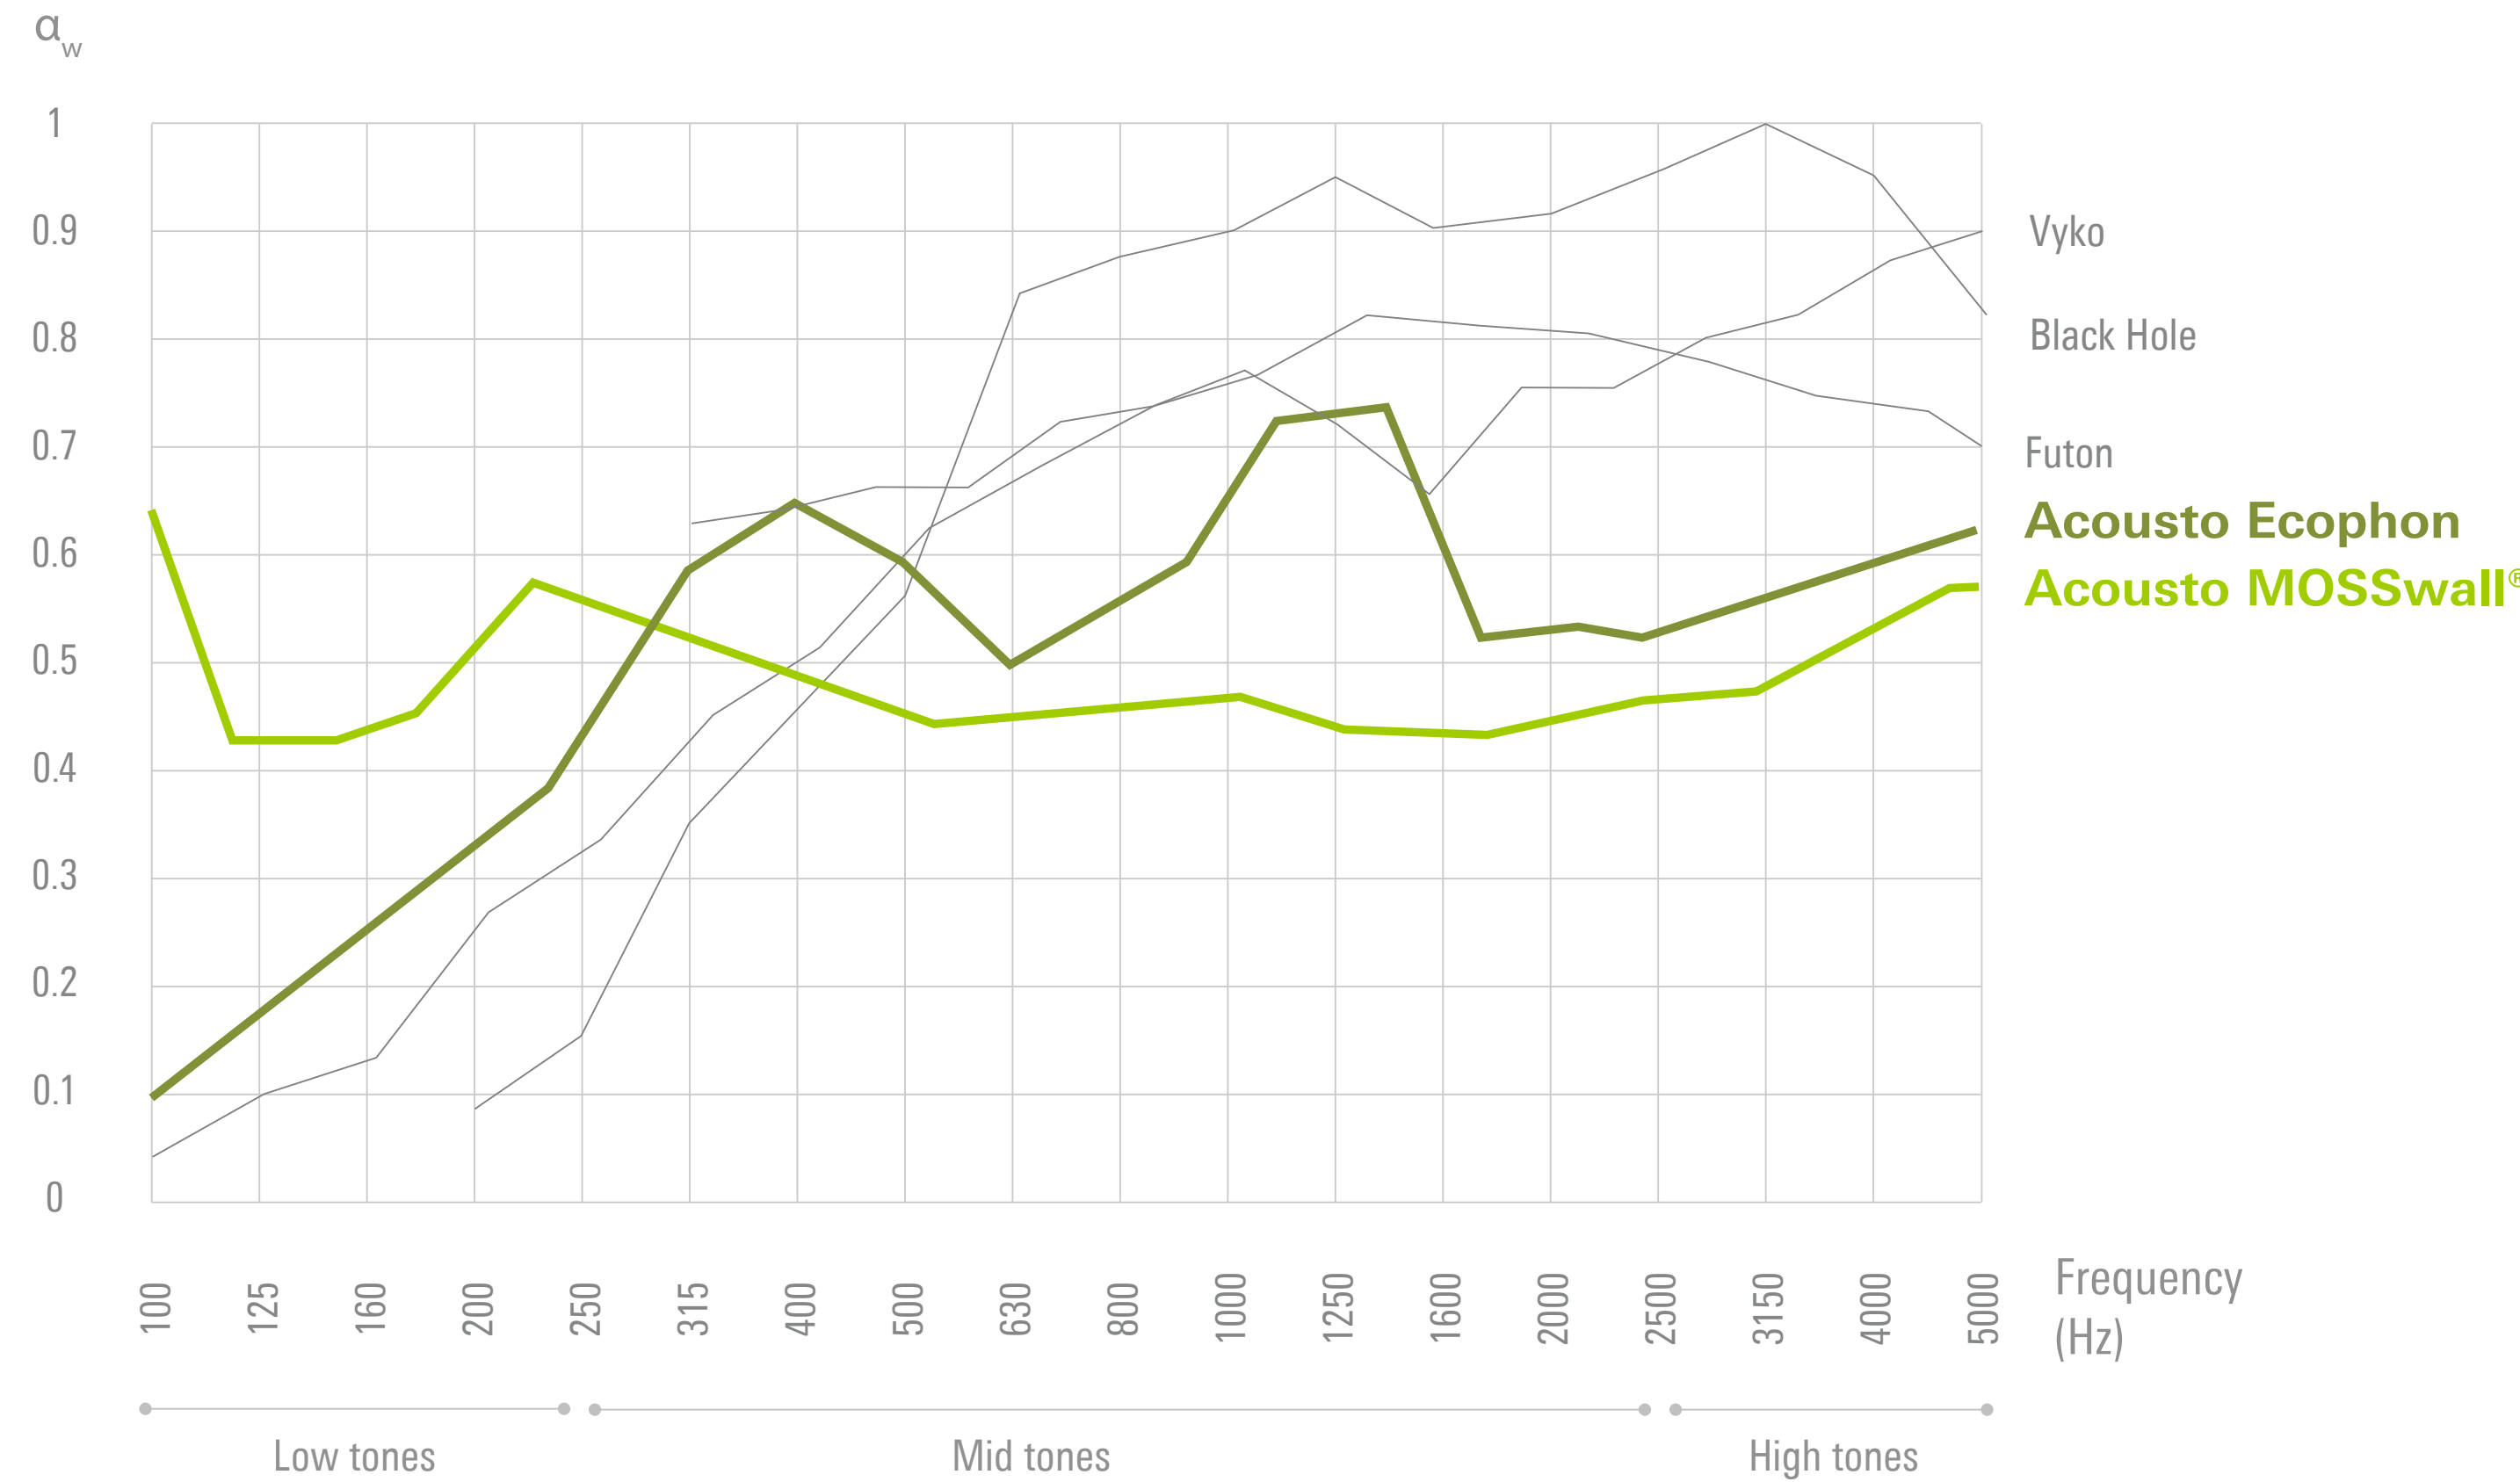

Work under maximum comfort

Acousto features A-class sound absorption. Measurements show that Mosswall® absorbs lower frequencies better, while Ecophon™ has better performance with speech frequencies.

Low tones **Mid tones** **High tones**

Be creative in compositions

Get inspired and draw your light as big and as bold as you want. Integrate it in the space and give your visitors a reason to look up. Acousto is with its universal form both decorative and at the same time fulfills sound absorption requirements.

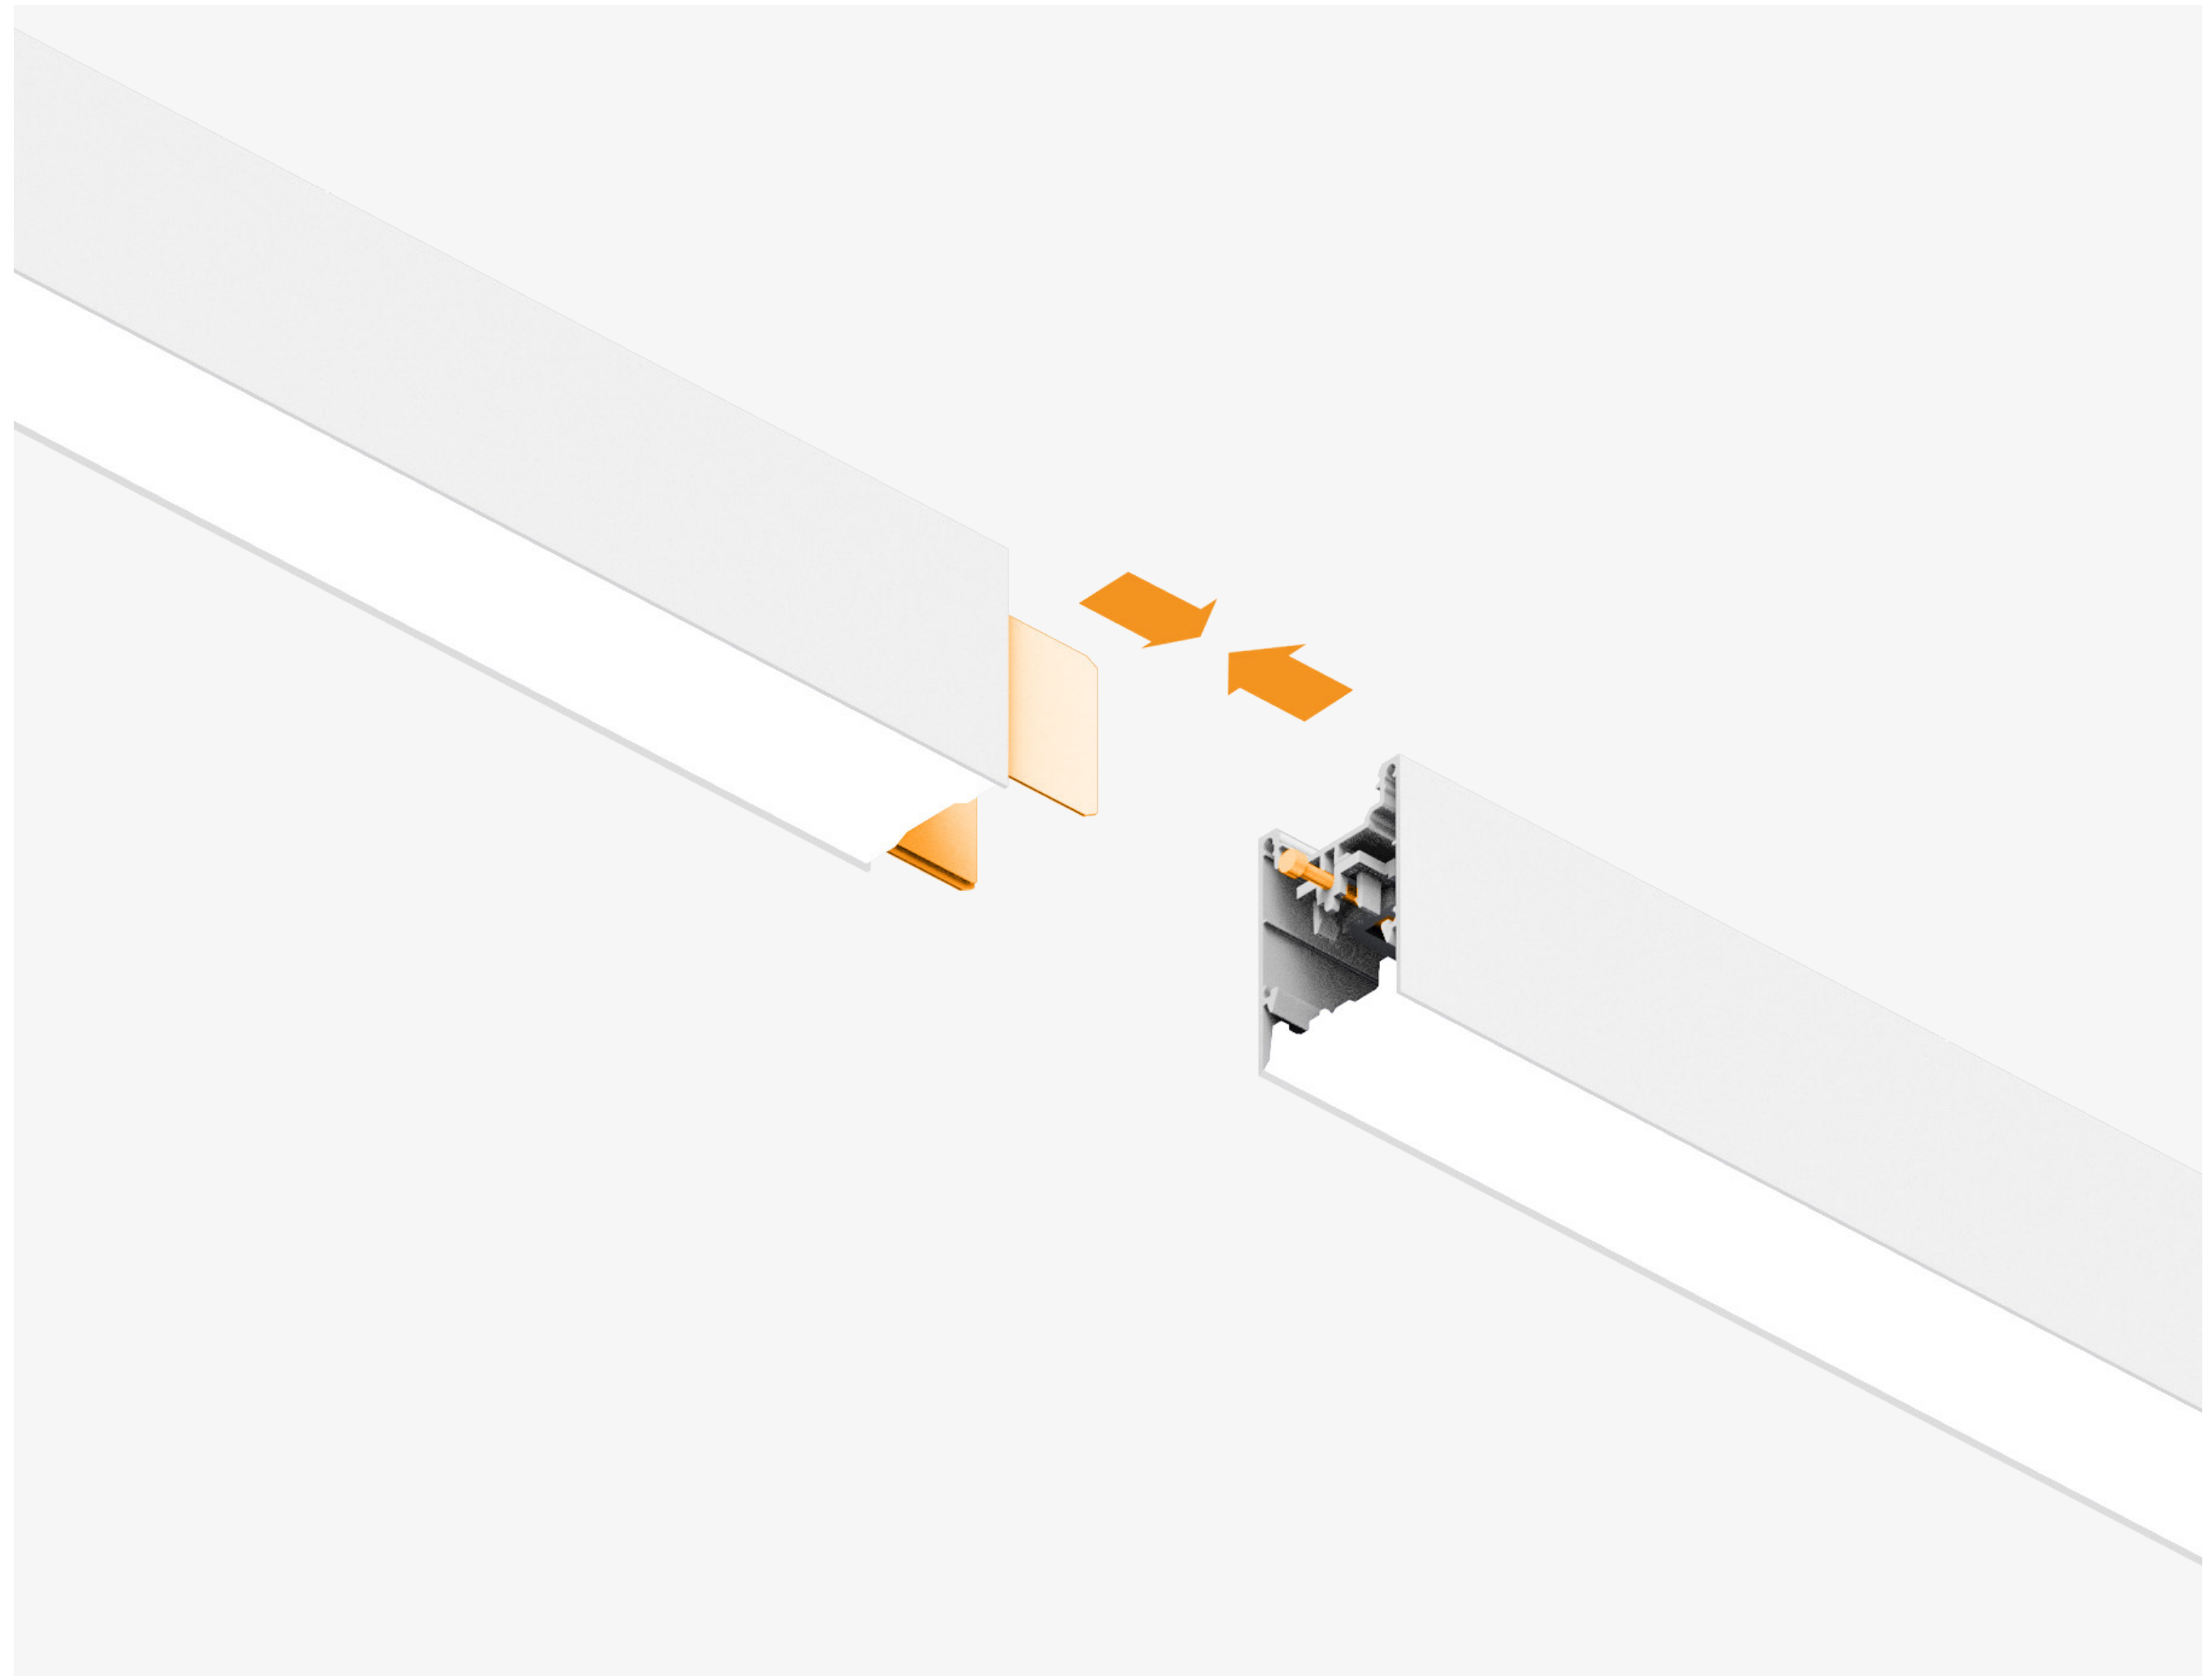

Perfect joints, no light gaps

With an innovative twist and lock joint element the assembly between two modules is now quick and easy and the profiles are strongly connected with no risk of bending. The light has absolutely no possibilities to escape. And that's why we call it NLG - No Light Gap.

Wide colour range

Choose from wide selection of frame colours.
Additional colours are available on request.

Choose the right diffuser

Use satin opal polycarbonate diffuser (SOP) for general illumination or soft-light prismatic diffuser (DPR) for task illumination.

Light control

Wireless lighting control system Casambi offers a big variety of possibilities for a user to interact with the lighting. The app for smartphones and tablets is the most elaborated user interface. Besides the app, traditional wall switches, push buttons, Casambi's own scene controllers and many other control points can be used.

Made in Europe

Our products are carefully planned, manufactured and tested in order to ensure reliable operation throughout their life span, to limit the environmental impact as little as possible and to co-create pleasant living conditions. Quality is our highest priority and way of life.

High standards and reliable quality of our products were certified by numerous organisations.
