A tribute to minimalism.

They say it's a thin line between elegance and confidence, but we say that there doesn't need to be any line at all, you can have this all together. Thanks to its application flexibility and lighting control, Vitka is one of our top notch ambient luminaires. Vitka doesn't need to hang out next to thick luminaires just to look thin. It is thin!

Discover the variety of Vitka's applications when you're creating an office, reception area, hospitality facilities or at home, and prepare for a big surprise from such a small luminaire. And that's the thin line everybody talks about.

Soft ambient light

Sometimes all you need is a light effect. A soft light that creates a beautiful, calm atmosphere. For such occasions Vitka is perfect.

Your best work companion

Put it on your desk. Especially in offices with general lighting sometimes you need a little of intimacy and a different atmosphere. Or when you work late at night and all the lights are turned off, switch Vitka on. It will be your best companion and motivator.

A big surprise for such a thin luminaire

Each and every single detail is the result of an accurate functional and aesthetic study, reflecting a refined look for optimal performance. The physical elements of Vitka luminaire collection have been designed to have a strong graphic impression even when the light is not in function.

Gesture control

Control your dim system with gestures for adapting the light level to the visual task. Holding finger at the sensor dims the luminous flux between the maximum and minimum level.

Creativity of application

The weight – a solid metal rectangular object is the sole element of stability. As the weight is not fixed in any way, it can be flipped and moved across the bottom line surface.

* The weight can be color customized upon request.

Removable weight

The stability weight can also be removed, allowing a more dynamic placement. When leaning against the wall it creates a more dramatic lighting atmosphere while free-standing positioning provides a more even distribution of light across the room.

Soft and pleasant ambient light

Light control

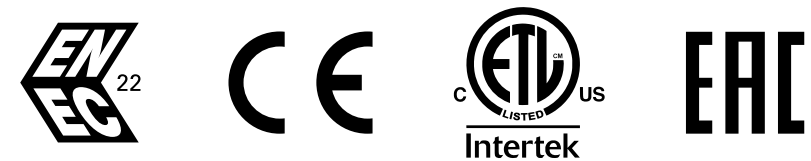

Wireless lighting control system Casambi offers a big variety of possibilities for a user to interact with the lighting. The app for smartphones and tablets is the most elaborated user interface. Besides the app, traditional wall switches, push buttons, Casambi's own scene controllers and many other control points can be used.

Made in Europe

Our products are carefully planned, manufactured and tested in order to ensure reliable operation throughout their life span, to limit the environmental impact as little as possible and to co-create pleasant living conditions. Quality is our highest priority and way of life.

High standards and reliable quality of our products were certified by numerous organisations.
